State Table 23.—SAMPLING RELIABILITY OF ESTIMATED TOTALS FOR COUNTY AND STATE BY NUMBER OF FARMS REPORTING, BY LEVELS

If the estimated number of farms reporting is—	Then the chances are about 2 in 3 that the estimated total would differ from the results of a complete tabulation of the items for all farms by less than—				If the estimated number of farms reporting is—	Then the chances are about 2 in 3 that the estimated total would differ from the results of a complete tabulation of the items for all farms by less than—			
	Level 1 ¹	Level 2	Level 3	Level 4		Level 1 ¹	Level 2	Level 3	Level 4
	Percent	Percent	Percent	Percent		Percent	Percent	Percent	Percent
25.....	40	53	71	96	5,000.....	2.8	3.7	5.0	6.8
50.....	28	37	50	68	10,000.....	2.0	2.6	3.5	4.8
100.....	20	26	35	48	25,000.....	1.3	1.7	2.2	3.0
250.....	13	17	22	30	50,000.....	0.9	1.2	1.6	2.1
500.....	8.9	12	16	21	100,000.....	0.6	0.8	1.1	1.5
1,000.....	6.3	8.4	11	15	250,000.....	0.4	0.5	0.7	1.0
2,500.....	4.0	5.3	7.1	9.6					

¹Level 1 should be used in determining the sampling reliability of estimated number of farms and farms reporting. The level for all other items should be obtained from State Table 26. If the estimated number of farms or farms reporting constitutes more than 75 percent of all farms in the universe, a better approximation to the sampling reliability may be obtained by multiplying the percent given in the table as follows:

1. When the number of farms or farms reporting is 75 percent of all farms, multiply the percent error by 0.50.
2. When the number of farms or farms reporting is 90 percent of all farms, multiply the percent error by 0.30.
3. When the number of farms or farms reporting is 95 percent of all farms, multiply the percent error by 0.20.

State Table 24.—INDICATED LEVEL OF SAMPLING RELIABILITY OF ESTIMATED COUNTY AND STATE TOTALS FOR SPECIFIED ITEMS

[To determine the sampling reliability for an item, use this table to determine which of the 4 levels of sampling reliability to use in State Table 23. To use State Table 25, it is necessary to refer also to county or State table to obtain the number of farms reporting for the item.]

Item (For definitions and explanations, see text)	Total	Size of farm group					Tenure of farm operator group			Economic class of farm group					Type of farm group						
		Under 50 acres	50-99 acres	100-249 acres	250-499 acres	500-999 acres	Full owners and managers	Part owners	All tenants	Class I and II	Class III	Class IV and V	Class VI, VII, and VIII	Cash grain	Cotton	Tobacco and other field crop	Vegetable and fruit-eval	Dairy	Poultry	Livestock farms other than poultry and dairy farms, livestock received, and general farms

Value of vegetables harvested for sale.....	dollars...	4	3	4	4	2	4	4	4	4	4	4	4	3	4	4	4	4	4	4	

Chapter B

STATISTICS FOR COUNTIES

(167)

County Table 1.—FARMS, ACREAGE, AND VALUE:

[Data for items shown in italics are based on

Item (for definitions and explanations, see text)		The State	Alamance	Alexander	Alleghany	Anson	Ashe	Avery	Beaufort	Bertie
FARMS, ACREAGE, AND VALUE										
1 Farms in 1949	number 1949	190,567	1,758	1,266	1,198	1,399	3,040	824	2,359	2,447
2 Farms in 1944	number 1944	267,906	2,749	1,504	1,447	2,238	3,754	1,509	3,194	3,165
3 Decrease in farms due to change in 4 farm definition 1944 to 1950	number	16,671	132	172	106	168	260	212	122	60
5 Acres of cropland	acres 1950	31,402,880	277,760	163,200	147,200	341,120	273,280	158,080	531,840	443,520
6 Acres of cropland	acres 1949	31,402,880	277,760	163,200	147,200	341,120	273,280	158,080	531,840	443,520
7 Acres of cropland	acres 1944	15,887,734	159,801	101,237	111,136	138,819	219,668	56,822	245,766	227,560
8 Acres of cropland	acres 1940	18,260,366	203,596	112,700	120,459	214,291	235,688	84,432	262,579	264,595
9 Average size of farm	acres 1950	83.4	90.9	80.0	135.0	72.3	69.0	104.2	93.0	93.0
10 Average size of farm	acres 1949	83.4	90.9	80.0	135.0	72.3	69.0	104.2	93.0	93.0
11 Average size of farm	acres 1944	68.2	73.3	74.9	83.4	95.8	61.7	56.0	82.2	83.6
Value of land and buildings										
12 Value of land and buildings	dollars 1959	14,685	14,387	10,040	12,694	11,359	9,702	9,938	17,022	17,498
13 Value of land and buildings	dollars 1949	8,359	7,234	6,080	7,045	5,184	6,835	4,761	9,499	9,208
14 Value of land and buildings	dollars 1944	193,44	178,10	117,01	141,92	133,03	147,10	153,98	183,12	204,53
15 Proportion of farms reporting value	percent 1959	78	64	71	83	66	88	91	84	59
16 Proportion of farms reporting value	percent 1949	79	72	72	81	88	83	89	83	83
Land in farms according to use:										
17 Cropland harvested	farms reporting 1959	177,251	1,563	1,138	1,130	1,261	2,842	773	2,166	2,254
18 Cropland harvested	farms reporting 1949	245,703	2,399	1,116	1,303	2,024	3,501	1,383	2,947	2,904
19 Cropland harvested	farms reporting 1944	4,746,366	43,657	20,662	17,339	21,145	27,546	8,003	110,546	75,080
20 1 to 2 acres	farms reporting 1959	53,460	437	467	618	340	2,263	989	613	333
21 1 to 2 acres	farms reporting 1949	77,423	820	488	351	329	667	154	454	462
22 1 to 2 acres	farms reporting 1944	77,423	820	488	351	329	667	154	454	462
23 10 to 19 acres	farms reporting 1959	47,716	268	317	601	371	871	254	820	752
24 10 to 19 acres	farms reporting 1949	29,949	269	150	155	236	204	48	362	522
25 10 to 19 acres	farms reporting 1944	45,938	269	216	168	231	231	81	592	841
26 20 to 49 acres	farms reporting 1959	27,753	263	114	93	182	93	42	657	557
27 20 to 49 acres	farms reporting 1949	35,529	355	135	74	150	101	40	491	737
28 50 to 99 acres	farms reporting 1959	15,547	176	59	35	152	32	21	294	281
29 50 to 99 acres	farms reporting 1949	15,013	219	59	35	209	34	1	262	211
30 100 to 199 acres	farms reporting 1959	4,356	46	13	9	61	1	3	134	62
31 100 to 199 acres	farms reporting 1949	3,160	36	11	6	69	1	4	113	26
32 200 to 499 acres	farms reporting 1959	1,218	1	1	1	38	1	1	76	8
33 200 to 499 acres	farms reporting 1949	872	10	1	1	31	1	1	49	1

County Table 4.—CHARACTERISTICS OF COMMERCIAL

(Data are based on reports for only

Item (For definitions and explanations, see text)	Jackson	Johnson	Jones	Lee	Lenoir	Lincoln	McDowell	Macon	Madison
Farms, acreage, and value									
1 All commercial farms..... number.....	222	4,644	817	661	2,146	623	97	302	1,569
2 Land in farms..... number.....	28,907	334,632	86,146	68,936	179,888	78,332	17,094	42,915	129,980
3 Average size of farm..... acres.....	130.2	72.1	105.4	104.3	83.8	125.7	176.2	142.1	82.8
4 Value of land and buildings..... number.....	11,472	17,138	16,462	19,311	26,265	16,824	29,877	20,011	7,266
5 Value of land and buildings..... average per acre, dollars.....	100.23	251.30	199.69	185.61	370.74	142.96	160.33	158.85	105.66
6 Cropland harvested..... farms reporting.....	222	4,558	810	646	2,126	587	92	297	1,498
7 Cropland harvested..... acres.....	3,252	138,466	31,751	17,466	77,700	32,334	3,695	7,223	17,540
Farm operators									
8 Working off their farms, total..... number.....	116	1,332	236	262	535	235	37	121	276
9 100 or more days..... number.....	31	327	51	101	165	120	22	35	26
10 With other income of family exceeding value of agricultural products sold..... number.....	31	233	37	80	152	136	31	65	51
By tenure.....									
11 Full owners..... number.....	142	1,261	265	167	535	282	61	196	873
12 Part owners..... number.....	35	1,031	146	248	294	210	36	96	370
13 Managers..... number.....	10	1	...	1	6
14 All tenants..... number.....	35	2,351	406	245	1,318	125	...	10	326
Specified equipment and facilities									
15 Grain combines..... farms reporting.....	...	273	64	69	77	272	32	...	15
16 Grain combines..... number.....	...	284	64	69	80	278	32	...	15
17 Corn pickers..... farms reporting.....	...	292	163	15	10	47	10	...	10
18 Corn pickers..... number.....	...	302	164	15	325	47	17	...	10
19 Pick-up trailers..... farms reporting.....	16	69	17	32	35	192	12	52	87
20 Pick-up trailers..... number.....	16	70	17	32	36	192	12	52	87
21 Motortrucks..... farms reporting.....	136	1,708	376	321	901	367	67	222	637
22 Motortrucks..... number.....	151	1,855	429	373	1,028	413	90	288	653
23 Tractors other than garden..... farms reporting.....	87	3,467	631	480	1,351	447	77	167	288
24 Tractors other than garden..... number.....	107	4,448	828	639	2,082	749	104	229	335
25 Automobiles..... farms reporting.....	92	3,763	682	524	1,736	506	65	151	633
26 Automobiles..... number.....	92	4,194	723	614	1,980	597	75	171	670
27 Telephone..... farms reporting.....	66	1,113	182	350	595	373	22	86	132
28 Wire fence..... farms reporting.....	66	3,233	597	377	1,424	296	45	141	248
29 Milking machine..... farms reporting.....	10	25	5	10	5	130	10	56	61
30 Electric milk cooler..... farms reporting.....	10	25	...	15	5	130	10	56	71
Farms by kind of road on which located									
31 Hard surface..... farms reporting.....	31	2,329	599	424	1,396	327	56	86	312
32 Gravel, shell, or shale..... farms reporting.....	136	310	15	16	...	40	35	166	666
33 Dirt or unimproved..... farms reporting.....	55	1,925	193	211	740	236	6	50	516
Farm labor, week preceding enumeration									
34 Family and/or hired workers..... farms reporting.....	217	4,030	705	556	1,616	538	82	297	1,266
35 Family workers, including operator..... farms reporting.....	217	4,009	700	551	1,575	538	81	287	1,256
36 Operators working 1 or more hours..... persons.....	202	3,924	675	541	1,530	517	81	287	1,206
37 Unpaid members of operator's family working 15 or more hours..... farms reporting.....	100	1,421	166	252	457	317	25	105	655
38 Unpaid members of operator's family working 15 or more hours..... persons.....	120	2,278	211	462	838	580	35	120	1,165
39 Regular hired workers (employed 150 or more days)..... farms reporting.....	10	193	48	29	170	26	27	41	5
40 Regular hired workers (employed 150 or more days)..... persons.....	10	261	64	70	378	29	38	52	5
Livestock and poultry on farms									
41 Cattle and calves..... farms reporting.....	187	1,299	200	278	447	473	60	287	1,329
42 Cattle and calves..... number.....	2,510	6,335	1,464	1,672	3,418	8,587	850	6,483	12,016
43 Milk cows..... farms reporting.....	180	861	126	226	283	581	51	252	1,227
44 Milk cows..... number.....	420	1,594	146	476	380	3,697	286	2,264	3,191
45 Horses and/or mules..... farms reporting.....	131	1,615	295	285	196	26	166	1,084	1,084
46 Horses and/or mules..... number.....	177	2,455	439	492	1,678	329	43	287	1,791
47 Hogs and pigs..... farms reporting.....	155	3,870	669	456	1,453	458	67	191	1,027
48 Hogs and pigs..... number.....	440	77,013	15,906	4,106	21,768	3,977	2,602	886	4,429
49 Chickens, 4 months old and over..... farms reporting.....	155	3,297	572	448	1,496	361	66	186	1,142
50 Chickens, 4 months old and over..... number.....	4,225	317,825	20,585	138,815	61,255	35,065	22,355	37,770	31,710
Livestock and poultry sold									
51 Cattle, not counting calves, sold alive..... farms reporting.....	117	274	37	43	100	182	17	116	454
52 Cattle, not counting calves, sold alive..... number.....	1,324	832	232	276	776	984	68	1,981	2,211
53 Calves sold alive..... farms reporting.....	110	391	44	97	122	292	37	217	808
54 Calves sold alive..... number.....	479	1,280	231	393	607	1,123	183	1,613	2,651
55 Hogs and pigs sold alive..... farms reporting.....	30	2,811	524	163	973	172	36	51	75
56 Hogs and pigs sold alive..... number.....	290	73,181	12,400	3,086	16,279	4,096	2,095	1,431	850

County Table 5.—FARMS REPORTING BY OFF-FARM WORK; AND FARMS BY TENURE OF OPERATOR.

CENSUSES OF 1959

[Most data for 1959 are based on reports]

Item (For definitions and explanations, see text)		Folk	Randolph	Richmond	Robeson	Rockingham	Rowan	Rutherford	Sampson	Scotland	Stanly	
1	Estimated number of farms	1959	485	2,634	907	5,985	3,197	1,926	1,631	4,930	826	1,663
2		1951	1,054	3,581	1,569	8,062	4,714	2,969	3,088	6,812	1,212	2,235
Farm operators by age												
3	Operators reporting age	number 1959	499	2,621	923	5,899	3,185	1,911	1,659	4,935	798	1,637
4	Under 25 years	number 1959	7	32	12	153	134	11	10	168	14	15
5	25 to 34 years	number 1959	31	238	82	887	361	145	118	701	83	133
6	35 to 44 years	number 1959	101	559	181	1,589	381	310	281	1,384	212	358
7	45 to 54 years	number 1959	144	675	265	1,665	889	530	463	1,386	225	425
8	55 to 64 years	number 1959	103	566	193	998	620	401	404	911	150	349
9	65 or more years	number 1959	113	551	190	627	430	443	354	604	114	330
10	Average age	years 1959	52.6	52.1	51.8	47.0	48.4	53.2	57.3	47.7	49.2	52.0
Off farm work and other income												
11	Farm operators	operators reporting 1959	284	1,406	482	1,777	1,225	1,136	950	1,852	301	942
12	Working off their farms	operators reporting 1959	722	2,102	688	1,707	1,481	1,821	1,825	1,501	453	1,288
13	100 or more days	operators reporting 1959	215	1,102	302	800	760	969	735	886	174	785
14		1954	596	1,477	382	602	911	1,536	1,320	869	228	1,063
15	With other income of family exceeding value of farm products sold	operators reporting 1959	347	1,374	371	732	845	1,223	1,003	1,073	227	902
16		1954	641	1,688	422	461	976	1,641	1,576	957	196	978
Farms by tenure of operator												
17	Full owners	number 1959	382	1,766	472	1,802	1,098	1,218	1,148	1,804	207	1,028
18		1954	678	2,529	749	2,103	1,468	1,926	2,429	2,709	270	1,295
19	Part owners	number 1959	76	667	238	677	837	551	348	1,263	123	504
20		1954	141	668	263	540	668	600	492	1,261	143	558

NORTH CAROLINA

PRODUCTS CUT ON FARMS: CENSUSES OF 1959 AND 1954—Continued

[illegible]

APPENDIX

The Questionnaire

Index to tables

(301)

This census is authorized by Act of Congress, United States Code, Title 13, Sections 5, 9, 142, 221, 4, requiring that the inquiries be answered completely and accurately, and guaranteeing that the information furnished be accorded confidential treatment. The census report cannot be used for purposes of taxation, investigation, or regulation.

U.S. DEPARTMENT OF COMMERCE—BUREAU OF THE CENSUS
PARSONS, KANSAS

NORTH CAROLINA
A1 CENSUS OF AGRICULTURE QUESTIONNAIRE: 1959

A1 No. _____

Section I—PERSON NOW IN CHARGE

If a member of the family or anyone else fills this questionnaire for the person in charge, be sure that all the information is given for the person in charge.

1. What is your name (person in charge)? _____

2. What is your mail address? _____

3. How many acres do you own? _____

Section II—OWNERSHIP

OWNED LAND. Include all land and tracts of land owned, regardless of where located, even though these are considered separate units, also cropland, pastureland, woodland, and wasteland.

4. How many acres do you own? _____

5. What is the name and address of each landlord and the number of acres rented or worked on shares for each? _____

6. How many acres do you rent to others? _____

Section III—CROPS HARVESTED THIS YEAR, 1959

Report all crops harvested or to be harvested this year from these—read answer for question 2, acres if you rent or work land for others on shares include landlord's share.

CORN AND SORGHUMS (Include the landlord's share as sold if taken from this place.)

10. Corn for all purposes? _____

11. Corn for grain? _____

12. Corn for silage? _____

SORGHUMS FOR GRAIN, FORAGE, AND SILAGE

13. Sorghums for all purposes? _____

14. Sorghums for grain or seed? _____

15. Sorghums for silage? _____

16. Sorghums cut for dry forage or hay, or hogged or grazed? _____

17. Sorghums for straw? _____

SOYBEANS, COWPEAS, AND PEANUTS (If grown with corn or other crops, report acreage of mixture as grown with other crops. If grown alone, report acreage as grown alone.)

18. Soybeans for all purposes? _____

19. Soybeans for beans? _____

20. Soybeans for hay? _____

21. Soybeans hogged or grazed, or cut for silage? _____

22. Soybeans plowed under for green manure, not grazed or otherwise harvested? _____

COWPEAS

23. Cowpeas for all purposes? _____

24. Cowpeas for dry peas? _____

25. Cowpeas for hay? _____

26. Cowpeas hogged or grazed, or cut for silage? _____

27. Cowpeas plowed under for green manure, not grazed or otherwise harvested? _____

PEANUTS

28. Peanuts for all purposes? _____

29. Peanuts for picking or threshing? _____

SMALL GRAINS (Include the landlord's share as sold if taken from this place.)

30. Wheat? _____

31. Oats for grain? _____

32. Barley? _____

33. Rye? _____

34. Other grains? _____

HAY AND GRASS SILAGE CROPS (If two or more cuttings, count the acres only once but give total production of all cuttings. Include the landlord's share as sold if taken from this place.)

35. Alfalfa and alfalfa mixtures for hay and for silage? _____

36. Clover, timothy, and mixtures of clover and grasses for hay? _____

37. Lespedeza for hay? _____

38. Oats, wheat, barley, rye, or other small grains cut for hay? _____

39. Any other hay? _____

40. Grass silage made from grasses, alfalfa, clover, or small grains? _____

LESPEDEZA SEED AND OTHER FIELD SEEDS

41. Were any lespedeza seed or other field seeds harvested this year? _____

42. Lespedeza seed? _____

43. Other field seeds? _____

Section VI—RACE, AGE, RESIDENCE, OFF-FARM WORK, AND OTHER INCOME.

216. What is your race? (Mark one) (1) ☐ White (2) ☐ Negro (3) ☐ Other _____ What race?

219. How old were you on your last birthday? _____ Years

220. Do you live on this place? ☐ No ☐ Yes

221. When did you begin to operate this place? Report month if you began to operate this place since January 1, 1959. _____ Month _____ Year

OFF-FARM WORK AND OTHER INCOME

222. How many days this year did you work off your farm? Include work at a nonfarm job, business, profession, or on someone else's farm. Include days you expect to work off your farm between now and December 31, 1959. (Do not include exchange work.) (Mark one) (1) ☐ None (2) ☐ 1 to 49 days (3) ☐ 50 to 99 days (4) ☐ 100 to 199 days (5) ☐ 200 or more days

223. Did any other member of your family living with you have a nonfarm job, business, profession, or work on someone else's farm this year? ☐ No ☐ Yes

224. Have you any income this year from any of the following sources: Sale of products from land rented out? Cash rent? Bondholders? Social Security? Old-age assistance? Pensions? Veterans' allowances? Unemployment compensation? Interest? Dividends? Profits from nonfarm business? Financial help from members of your family? ☐ No ☐ Yes

(If "None" for question 222 and "No" for both questions 223 and 224, skip to question 225.)

225. Will the income which you and your family receive from work off the farm and from other sources (listed in questions 223 and 224) be greater than the total value of all agricultural products sold or to be sold from your place this year? ☐ No ☐ Yes

Section VII—FOREST PRODUCTS THIS YEAR, 1959.

[225] How much was or will be received this year from the sale of standing timber or trees? (Include standing timber sold for pulpwood) None sold ☐ \$ _____

227. How much was or will be received this year from the sale of poles and piling, bark, bolts, mill timbers, and Christmas trees? (Do not include sale of standing timber, firewood, pulpwood, fence posts, and sawlogs) None sold ☐ \$ _____

(Answer these questions, if "Yes")

	(1) How much was or will be sold in 1959?	(2) How much was or will be sold in 1959?
228. Firewood and fuelwood?	_____ Cord	_____ Cord
229. Pulpwood?	_____ Number	_____ Number
230. Fence posts?	_____ Board feet	_____ Board feet
231. Sawlogs and veneer logs?	_____ Board feet	_____ Board feet

Were any of the following forest products cut this year for home use or for sale?

Section VIII—POULTRY AND LIVESTOCK NOW ON THIS PLACE AND LIVESTOCK PRODUCTION THIS YEAR, 1959.

Include all poultry and animals on this place owned by you, by your landlord, by your employees, and by others.

POULTRY

236. Are there any chickens, turkeys, or other poultry on this place? ☐ No ☐ Yes

237. If "No," were there any on this place any time this year? (If "No," for both questions 236 and 237, mark X and skip to question [246].) ☐ No ☐ Yes

238. How many chickens (hens, pullets, roosters, etc.) 4 months old and over are now on this place? None ☐ Number _____

239. How many broilers were or will be sold this year? (Report all broilers sold and those grown for others under contract.) None ☐ Number _____

240. How many hens, roosters, pullets, cockerels, and other chickens were or will be sold this year? None ☐ Number _____

241. How many dozens of chicken eggs were or will be sold this year? None ☐ Dozens _____

242. How many turkeys and turkey fryers were raised this year? (Include those raised from poult hatched, poult bought, and those raised for others under contract.) None ☐ Number _____

243. How many turkey hens now on hand are you keeping for breeding next year? None ☐ Number _____

244. How many ducks, geese, and other poultry (not counting chickens and turkeys) were sold this year? None ☐ Give _____ Name _____ Number _____

245. How much was or will be received this year from the sale of turkeys, ducks, geese, and miscellaneous poultry, and their eggs? None sold ☐ Value of sales \$ _____

SHEEP AND LAMBS

[246] How many ewes, rams, wethers, and lambs of all ages are on this place? None ☐ Number _____ (If "None," mark X and skip to question [247].)

Of this total, how many are—

(a) Lambs under 1 year old? _____ Number

(b) Ewes 1 year old and over? _____ Number

(c) Rams and wethers 1 year old and over? _____ Number

(The total for questions (a), (b), and (c) must equal the number for question 246.)

MULES AND HORSES

[247] How many mules, horses, colts, and ponies are on this place? None ☐ Number _____

SHEEP AND LAMBS SHORN THIS YEAR, 1959

251. Were any sheep or lambs shorn this year? ☐ No ☐ Yes

(If "No," mark X and skip to question [254].)

(Answer these questions, if "Yes")

	(1) How many were shorn?	(2) How much wool was shorn?
252. Were any lambs shorn in 1959?	None <input type="checkbox"/> Number _____	None <input type="checkbox"/> Lb. _____
253. Were any sheep shorn in 1959?	None <input type="checkbox"/> Number _____	None <input type="checkbox"/> Lb. _____

HOGS AND PIGS

[254] How many hogs and pigs of all ages, including cubs and boars, are on the place? ☐ None ☐ Number _____ (If "None," mark X and skip to question [255].)

Of this total, how many were born—

(a) Since June 1, this year? _____ Number

(b) Before June 1, this year? _____ Number

(The total for questions (a) and (b) must equal the number for question 254.)

SOWS AND GILTS FARROWING

[255] How many litters were farrowed since June 1, this year or will farrow before December 1? ☐ None ☐ Number of litters

256. How many litters were farrowed between December 1, last year, and June 1, this year? ☐ None ☐ Number of litters

CATTLE AND CALVES (Include all cows and all other cattle and calves, both dairy and beef, on this place.)

257. How many cattle and calves of all ages are on this place? ☐ None ☐ Number _____ (If "None," mark X and skip to question [262].)

Of this total, how many are—

(a) Cows? (Include heifers that have calved) _____ Number

(b) Heifers and beef calves? (Do not include any heifers that have calved) _____ Number

(c) Bulls, bull calves, steers, and steer calves? _____ Number

(The total for questions (a), (b), and (c) must equal the number for question 257.)

COWS MILKED AND BUTTER CHURNED

258. How many cows and heifers were milked yesterday? ☐ None ☐ Number _____

259. How many milk cows were on this place yesterday? (Include dry milk cows and milk heifers that have calved) ☐ None ☐ Number _____

260. How many gallons of milk were produced yesterday? ☐ None ☐ Gallons _____

261. How many pounds of butter were churned last week? ☐ None ☐ Pounds _____

These questions are to be answered by CENSUS ENUMERATOR

(a) Does A1 number add in 3 or 7? ☐ No ☐ Yes

(b) Are acres in question 7, 1,000 or more? ☐ No ☐ Yes

Section IX—DAIRY PRODUCTS SOLD AND TO BE SOLD THIS YEAR, 1959.

[262] Was any milk or cream sold this year, 1959? ☐ No ☐ Yes

(If "No," mark X and skip to question [265].)

Report all sales from this place whether made by you or by others. Report dairy products sold for your landlord. Be sure to include dairy products which you will sell by December 31, this year.

(For each item, answer these questions)

	(1) Quantity sold or to be sold in 1959?	(2) How much was or will be the value of sales in 1959?
263. How much whole milk was or will be sold in 1959? (Report in pounds of milk, gallons of milk, or pounds of butterfat)	None <input type="checkbox"/> Lb. of milk _____ or 1: Gallons of milk _____ or 2: Lb. of butterfat _____	\$ _____
264. How much cream was or will be sold in 1959? (If cream was sold by the gallon, multiply the number of gallons by 2½ to get pounds of butterfat.)	None <input type="checkbox"/> Lb. of butterfat _____	\$ _____

Section X—ANIMALS SOLD AND TO BE SOLD ALIVE THIS YEAR, 1959.

Report all sales from this place whether made by you or by others. Report all animals turned over to or sold for your landlord, and animals fed under contract for others. Be sure to report animals which you will sell by December 31, this year.

(Answer these questions, if "Yes")

	(1) How many have been sold this year?	(2) How many will be sold between now and Dec. 31?	(3) How much was or will be the value of sales in 1959?
265. Calves?	None <input type="checkbox"/> Number _____	None <input type="checkbox"/> Number _____	\$ _____
266. Cattle, not counting calves?	None <input type="checkbox"/> Number _____	None <input type="checkbox"/> Number _____	\$ _____
267. Mules, horses, colts, and ponies?	None <input type="checkbox"/> Number _____	None <input type="checkbox"/> Number _____	\$ _____
268. Hogs and pigs?	None <input type="checkbox"/> Number _____	None <input type="checkbox"/> Number _____	\$ _____
269. Sheep and lambs?	None <input type="checkbox"/> Number _____	None <input type="checkbox"/> Number _____	\$ _____

Were any of the following animals sold or will any be sold this year?

Section XI.—FERTILIZER AND LIME

Include all fertilizer and lime used on this place during 1959, whether purchased by you or by your landlord.

271. On how many acres was commercial fertilizer and fertilizing materials used in 1959? None ☐ Acres

(If "None," mark X and skip to question [272].)

(Answer these questions if "Yes")

	On how many acres was fertilizer used?	How much was used—			
		(1) Dry materials* (Include rock phosphate)	(2) Liquid materials*	(3) Lime	(4) Other
(a) Hay and cropland pasture?		Tons	Tons	Tons	Tons
(b) Other pasture (not cropland)?					
(c) Corn?					
(d) Cotton?					
(e) Tobacco?					
(f) All other crops?					

[272] How many acres were limed in 1959? None ☐ Acres

(If "None," mark X and skip to question [274].)

273. How much lime or liming materials was used in 1959? Tons

*Include ground limestone, hydrated and burnt lime, marl, oyster shells, etc. (lime lime used for sprays or sanitation.)

Section XII.—SELECTED FARM EXPENDITURES AND LAND-USE PRACTICES, THIS YEAR, 1959.

EXPENDITURES Include expenses paid, or to be paid by December 31, 1959, by you and your

How much was or will be spent this year for	[274] Feed for livestock and poultry? (Include cost of grain, hay, mill feeds, concentrates, and roughage; also amounts paid for grinding and mixing feed.)	None <input type="checkbox"/>	\$	00
	275. The purchase of livestock and poultry? (Include baby chicks.)	None <input type="checkbox"/>	\$	00
	276. Machine hire? (Include custom work such as tractor hire, threshing, combining, cotton picking, cotton ginning, win filling, corn picking, baling, plowing, fruit picking, spraying and dusting.)	None <input type="checkbox"/>	\$	00
	277. Hired labor? (Do not include housework, custom work, or contract construction work. Include cash payments only.)	None <input type="checkbox"/>	\$	00
	278. Seeds, bulbs, plants, and trees?	None <input type="checkbox"/>	\$	00
	279. Gasoline and other petroleum fuel and oil for the farm business?	None <input type="checkbox"/>	\$	00

LAND-USE PRACTICES

280. How many acres of land were used to grow cover crops this year and then planted to another crop?	None <input type="checkbox"/>	Acres
281. How many acres of cropland used for grain or row crops this year were farmed on the contour?	None <input type="checkbox"/>	Acres
282. How many acres of strip-cropping systems for soil-erosion control were on the place this year?	None <input type="checkbox"/>	Acres
283. How many acres of crop and pasture land on this place have terraces?	None <input type="checkbox"/>	Acres

Section XIII.—FARM LABOR

284. About how many hours last week did you (the person in charge of this place) do farm work or chores on this place? (Mark one)	1	2	3
	None	1 or less hours	12 hours or more
285. How many other members of your family did 15 hours or more of farm work or chores on the place last week without receiving cash wages? (Do not include housework.)	None	Persons	
286. How many hired persons did any farm work or chores on the place last week? (Include members of your family receiving cash wages.)	None	Persons	

(If "None," mark X and skip to question [291].)

287. Of these hired persons working last week, how many were employed on this place for

(a) 150 days or more during this year? None ☐ Persons

(b) Less than 150 days during this year? None ☐ Persons

(The total for questions (a) and (b) must equal the number for question 286.)

	(1) Number of persons	(2) What was the agreed cash rate of pay? (If more than one person, give average.)	(3) How many hours per person were these workers expected to work to earn that pay? Per month hours
288. Of these hired persons working last week, how many were paid on a			
Monthly basis?	Persons	Dollars only	Per month hours
Weekly basis?	Persons	Dollars only	Per week hours
Daily basis?	Persons	Dollars only	Per day hours
Hourly basis?	Persons	Dollars only	Per hour hours
Piecework basis?	Persons	Cents	Per piece

(The total of the persons reported in column 1 must equal the number for question 286.)

289. How many hired persons (part or a piecework basis) worked on the place last Friday? None ☐ Persons

(If "None," mark X and skip to question [291].)

290. How much did these hired persons on piecework reported for question 288 earn for their work last Friday? \$ 00

Section XIV.—EQUIPMENT AND FACILITIES NOW ON THIS PLACE

Include equipment, whether owned by you or by others, on this place. Include equipment and facilities that are temporarily out of order.

	Number
[291] Grain combines?	
292. Corn pickers (include picker-shellers and corn combines)?	
(3) Pick-up balers?	
294. Field forage harvesters (for field chopping of silage and forage crops)?	
295. Motortrucks (include pick-ups)?	
296. Wheel tractors other than garden?	
297. Garden tractors?	
298. Crawler tractors (tracklaying)?	
299. Automobiles?	
300. Telephone?	No <input type="checkbox"/> Yes <input type="checkbox"/>
301. Home freezer (for quick freezing and storing food)? (Do not include refrigerators.)	No <input type="checkbox"/> Yes <input type="checkbox"/>
302. Milking machine?	No <input type="checkbox"/> Yes <input type="checkbox"/>
303. Electric milk cooler?	No <input type="checkbox"/> Yes <input type="checkbox"/>
305. Crop drier (for grain, forage, or other crops)?	No <input type="checkbox"/> Yes <input type="checkbox"/>
306. Power-operated elevator, conveyor, or blower?	No <input type="checkbox"/> Yes <input type="checkbox"/>

307. On what kind of road is this place located? (Mark one)

(1) Hard surface ☐ (2) Gravel, shell, or shale ☐ (3) Dirt or unimproved ☐

If marked here, answer: How many miles to a hard surface road? Less than 1 mile OR Whole miles

Section XV.—RENTAL AGREEMENT, FARM VALUES, AND MORTGAGE DEBT

308. a. Do you rent any land from others?	No <input type="checkbox"/> Yes <input type="checkbox"/>
b. Do you work any land on share?	No <input type="checkbox"/> Yes <input type="checkbox"/>
(If "Yes" for both questions 308 a. and 308 b., mark X and skip to question [314].)	
(If "Yes" for either question 308 a. or 308 b., answer questions 309 through 313.)	
309. Does the landlord furnish all the work animals or tractor power as a part of his share of the operation of this place?	No <input type="checkbox"/> Yes <input type="checkbox"/>
310. Do you pay to your landlord any cash as rent?	No <input type="checkbox"/> Yes <input type="checkbox"/>
a. If "Yes," how much for the year?	\$ 00
311. Do you pay to your landlord any share of the crops (such as 1/3, 1/2)?	No <input type="checkbox"/> Yes <input type="checkbox"/>
312. Do you pay to your landlord any share of the livestock or livestock products, such as 1/3, 1/2?	No <input type="checkbox"/> Yes <input type="checkbox"/>
313. Do you have the land under any other arrangement, such as a fixed quantity of any product, upward of land and buildings, payment of taxes, keep of landlord, rent free, etc? No <input type="checkbox"/> Yes <input type="checkbox"/>	

	(1) Acres	(2) Total value (dollars)
[314] About how much would the land and the buildings sell for		
a. Land and buildings owned by you? (Copy acres from question 3)		\$ 00
b. Land and buildings rented from others? (Copy acres from question 4)		\$ 00
c. Land and buildings managed for others? (Copy acres from question 5)		\$ 00
d. Land and buildings rented to others? (Copy acres from question 6)		\$ 00

315. Is there any mortgage debt on land and buildings owned by you? Mark one

No ☐ Yes ☐ No land owned ☐

316. On what date did you fill this questionnaire? Give month and day 1959

REMARKS

PREFACE

Volume I, Counties, is one of the five principal reports presenting the results of the 1959 Census of Agriculture. This volume, in 54 parts, presents the compilation of the information given by farm operators to census enumerators in 1959.

The 1959 Census of Agriculture was taken in conformity with the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

The collection of the data was carried out by census enumerators directed by supervisors appointed by the Director of the Bureau of the Census and working under the direction of Robert B. Voight, then Chief, Field Division. Paul R. Squires, then Special Assistant to the Director, was responsible for the recruitment of the field staff. The planning of the census and the compilation of the statistics were supervised by Ray Hurley, Chief, Agriculture Division, Warder B. Jenkins, Assistant Chief, and Orvin L. Wilhite, Assistant Chief. They were assisted by M. Vincent Lindquist, Thomas Jabine, Robert S. McCauley, John C. Maekey, Robert Standley, Hilton E. Robison, Helen E. Teir, Carl R. Nyman, Kenneth R. Norell, Gladys L. Eagle, Henry L. DeGraff, Charles H. Boehne, Joseph A. Correll, Margaret G. Wood, Evelyn K. Jett, Simon Yablon, Emma B. Gass, Charlotte J. Messinese, Bennie L. Sharp, Isaac E. Lemon, James M. Lindsey, Samuel S. Murray, William F. Kauffman, Hector Vila, Harry P. Owings, Charles A. Nicholls, Henry A. Tucker, Robert S. Boyle, Helen M. Davenport, Albert W. Graybill, Lois G. Miller, Thomas D. Monroe, Gerald P. Owens, Bernard L. Ross, Marvin M. Thompson, Helen D. Turner, Kurt W. Luethy, Arnold L. Bollenbacher, George W. Coffman, Joseph A. Horak, Samuel J. Hundley, Donald K. October 1961

UNITED STATES CENSUS OF AGRICULTURE: 1959

FINAL REPORTS

Volume I—Counties.—A separate part for each State. Statistics on number of farms; farm characteristics; acreage in farms; cropland and other uses of land; land-use practices; irrigation; farm facilities and equipment; farm labor; farm expenditures; use of commercial fertilizer; number and kind of livestock; acres and production of crops; value of farm products; characteristics of commercial farms, farms classified by tenure, by size, type, and economic class; and comparative data from the 1954 Census of Agriculture.

Volume I is published in 54 parts as follows:

Part	State or States	Part	State or States	Part	State or States
1	New England States:	19	West North Central—Continued	38	Mountain:
2	Maine.	20	South Dakota.	39	Montana.
3	New Hampshire.	21	Nebraska.	40	Idaho.
4	Vermont.		Kansas.	41	Wyoming.
5	Massachusetts.	22	South Atlantic:	42	Colorado.
6	Rhode Island.	23	Delaware.	43	New Mexico.
	Connecticut.	24	Maryland.	44	Arizona.
7	Middle Atlantic States:	25	Virginia.	45	Utah.
8	New York.	26	West Virginia.		Nevada.
9	New Jersey.	27	North Carolina.	46	Pacific:
	Pennsylvania.	28	South Carolina.	47	Washington.
10	East North Central:	29	Georgia.	48	Oregon.
11	Ohio.		Florida.	49	California.
12	Indiana.	30	East South Central:	50	Alaska.
13	Illinois.	31	Kentucky.		Hawaii.
14	Michigan.	32	Tennessee.	51	Other Areas:
	Wisconsin.	33	Alabama.	52	American Samoa.
15	West North Central:	34	Mississippi.	53	Guam.
16	Minnesota.	35	West South Central:	54	Puerto Rico.
17	Iowa.	36	Arkansas.		Virgin Islands.
18	Missouri.	37	Louisiana.		
	North Dakota.		Oklahoma.		
			Texas.		

Volume II—General Report.—Statistics by Subjects, United States Census of Agriculture, 1959. Summary data and analyses of the data by States, for geographic divisions, and for the United States, by subjects, as illustrated by the chapter titles listed below:

Chapter	Title	Chapter	Title
I	Farms and Land in Farms.	VII	Field Crops and Vegetables.
II	Age, Residence, Years on Farm, Work Off Farm.	VIII	Fruits and Nuts, Horticultural Specialties, Forest Products.
III	Farm Facilities, Farm Equipment.	IX	Value of Farm Products.
IV	Farm Labor, Use of Fertilizer, Farm Expenditures, and Cash Rent.	X	Color, Race, and Tenure of Farm Operator.
V	Size of Farm.	XI	Economic Class of Farm.
VI	Livestock and Livestock Products.	XII	Type of Farm.

Volume III—Irrigation of Agricultural Lands. Western States (Dry Areas)—Data by States for drainage basins and a summary for the area, including number and types of irrigation organizations, source of water, expenditures for works and equipment since 1950, water used and acres served for irrigation purposes.

Volume IV—Drainage of Agricultural Lands. Data by States on land in drainage organizations, number and types of organizations, cost of drainage and drainage works.

Volume V—Special Reports, Part 1.—Horticultural Specialties. Statistics by States and a summary for the United States presenting number and kinds of operations; gross receipts and/or gross sales; sales of nursery products, flower seed, vegetables grown under glass, and propagated mushrooms; number of container-grown plants; inventory products; sales of bulb crops; employment; structures and equipment.

Titles of additional parts of this volume are not available as this report goes to press.

Chapter A—STATISTICS FOR THE STATE

State Table—

	Page
1.—Farms, acreage, and value: Censuses of 1920 to 1959.....	3
2.—Farms and farm acreage according to use, by size of farm: Censuses of 1930 to 1959.....	4
3.—Farms and farm acreage, by color and tenure of operator: Censuses of 1920 to 1959.....	6
4.—Farm operators by color, age, residence, and off-farm work; and equipment and facilities on farms: Censuses of 1920 to 1959.....	7
5.—Specified farm expenditures and farm labor: Censuses of 1920 to 1959.....	8
6.—Livestock and poultry on farms, number and value: Censuses of 1920 to 1959.....	9
7.—Livestock and livestock and poultry products sold: Censuses of 1920 to 1959.....	10
8.—Farms reporting, acreage, quantity harvested, and sales of crops: Censuses of 1920 to 1959.....	11
9.—Nursery, greenhouse, and forest products: Censuses of 1920 to 1959.....	18
10.—Characteristics of places not counted as farms because of change in definition of farm: 1949.....	19
11.—Date of enumeration: Censuses of 1959 and 1954.....	19
12.—Farms reporting classified by number of livestock on farms and by quantity of livestock and livestock and poultry products sold: Censuses of 1959 and 1954.....	20
13.—Farms reporting classified by acres harvested, quantity harvested, and quantity sold for selected crops: Censuses of 1959 and 1954.....	21
14.—Hired farm labor and wage rates, Censuses of 1959 and 1954; and by economic class of farm, Census of 1959.....	26
15.—Hired farm labor and wage rates, Censuses of 1959 and 1954; and by type of farm, Census of 1959.....	28
16.—Hired farm labor and wage rates, Censuses of 1959 and 1954; and by size of farm, Census of 1959.....	30
17.—Farms and farm characteristics by economic class of farm: Census of 1959.....	32
18.—Farms and farm characteristics of commercial farms by type of farm by economic class of farm: Census of 1959.....	44
19.—Farms and farm characteristics by type of farm: Census of 1959.....	92
20.—Farms and farm characteristics by size of farm: Census of 1959.....	104
21.—Farms and farm characteristics by tenure of operator: Census of 1959.....	116
22.—Cash rent paid by cash tenants and share-cash tenants by economic class of farm: Census of 1959.....	152
23.—Sampling reliability of estimated totals for county and State by number of farms reporting, by levels.....	152
24.—Indicated level of sampling reliability of estimated county and State totals for specified items.....	153

Chapter B—STATISTICS FOR COUNTIES

County Table—

1.—Farms, acreage, and value: Censuses of 1959 and 1954.....	156
2.—Number of farms, land in farms, and cropland harvested, by size of farm: Censuses of 1959 and 1954.....	160
3.—Farms and farm acreage by tenure of operator: Censuses of 1959 and 1954.....	164
4.—Characteristics of commercial farms, Census of 1959.....	168
5.—Farms reporting by off-farm work; and farms by tenure of operator, type of farm, economic class of farm, and value of farm products sold, by source: Censuses of 1959 and 1954.....	172
6.—Equipment and facilities on farms and farm labor: Censuses of 1959 and 1954.....	176
7.—Use of fertilizer and lime on farms and farm expenditures: Censuses of 1959 and 1954.....	180
8.—Livestock and poultry on farms: Censuses of 1959 and 1954.....	184
9.—Livestock and livestock products sold from farms and litters farrowed: Censuses of 1959 and 1954.....	188
10.—Dairy products and poultry and poultry products sold from farms: Censuses of 1959 and 1954.....	192
11.—Farms reporting acreage and quantity of crops harvested: Censuses of 1959 and 1954.....	194
12.—Nursery and greenhouse products and forest products cut on farms: Censuses of 1959 and 1954.....	214

INTRODUCTION

THE 1959 CENSUS OF AGRICULTURE

History of the Census.—The 1959 Census is the 17th nationwide agricultural census. The first agricultural census was taken in 1810, at the same time as the Sixth Decennial Census of Population. From 1850 to 1920, an agricultural census was taken every 10 years. With increased application of scientific findings and the growing use of mechanization in agriculture, farming practices were changing so rapidly that facts collected at 10-year intervals were no longer adequate. Aware of the need for more accurate and timely information, the Congress in 1909 (36 stat. 10, sec. 31, provided for a census to be taken in 1915 and every 10 years thereafter which was to be in addition to the census of agriculture to be taken at the time of the decennial census of population. The 1915 census was not taken, however, because of the abnormal conditions created by World War I. Beginning with 1920, a national agricultural census has been taken every 5 years.

Legal Basis for the Census.—The 1959 Census of Agriculture was authorized by an Act of Congress, as were all prior censuses of agriculture. "Title 13, United States Code-Census," codified in August 1951, and amended in August 1957 and September 1960, is now the legal basis for censuses of agriculture and other censuses, and surveys conducted by the Bureau of the Census. Section 142, paragraph (a), of Title 13 makes provision for the Census of Agriculture. It reads as follows:

"The Secretary shall, beginning in the month of October 1959, and in the same month of every fifth year thereafter, take a census of agriculture, provided that the censuses directed to be taken in October 1959 and each tenth year thereafter, may, when and where deemed advisable by the Secretary, be taken instead in conjunction with the censuses provided in section 141 of this title." (Section 141 relates to the decennial censuses of population, unemployment, and housing to be taken as of the first day of April of each decennial year.) Under authority granted by Section 4 of Title 13, the Secretary of Commerce delegated "the functions and duties imposed upon him by this title" to the Director of the Bureau of the Census.

Pretest of the 1959 Census.—A "pretest" of the field procedures of the 1959 Census of Agriculture was conducted in 17 counties of the United States during the fall of 1958. The purpose of the pretest was to provide the Bureau with a measure of the effectiveness of the questions and procedures planned for the 1959 nationwide census. Three versions of the agriculture questionnaire—the first one for Northern States, the second for Southern States, and the third for Western States—were used in the pretest. Each version contained questions appropriate to the type of agriculture in the part of the country where it was used. All major aspects of field forms and procedures, from the hiring and training of crew leaders and enumerators to actual interviews with farm operators, were given a "trial run" in each of the 17 counties. Preliminary versions of reporting forms, maps, payroll records, training guides, and instruction manuals were subjected to actual use under conditions simulating those expected in the nationwide enumeration conducted in the fall of 1959.

In making final preparations for the 1959 census, the staff of the Bureau drew heavily on the results of the pretest, as well as on experience gained from previous censuses.

Training Program for Personnel for Enumeration.—Every person hired to do work in connection with the 1959 Census of Agriculture received specialized training for his job. Staff mem-

bers of the Washington and Regional Offices of the Bureau and of the U.S. Department of Agriculture trained approximately 110 agriculture field assistants and 2,100 crew leaders. The crew leaders, in turn, trained and supervised approximately 30,000 enumerators. All training was presented according to procedures contained in various guides and manuals prepared by the Bureau. The training program included filmstrips, map-reading, practice interviewing, and practice filling of questionnaires and other census forms. In most instances, training sessions were held near the areas in which employees worked and immediately prior to the beginning of their assignments.

Enumeration Period.—The actual enumeration in the conterminous United States (see page XIV) started at dates varying from October 7 to November 18, 1959. In general, starting dates were based upon regional variations in harvesting seasons and on weather conditions. The primary aim was to have the enumeration late enough to follow the harvesting of the bulk of important crops and early enough to precede the advent of winter weather with the attending unfavorable travel conditions. The bulk of the enumeration work was completed within three to four weeks after the starting date. In Hawaii, the enumeration was made during the months of December 1959 and January 1960; and in Alaska, during April 1960.

Enumeration starting dates for the censuses of 1959 and 1954 are given in State table 11, together with figures showing the percentage of farms enumerated in the State during weekly periods. The average enumeration date for the 1959 census for each county is given in county table 6.

Data for inventory items—land in farms, machinery and equipment, livestock, and poultry—relate to the situation at the actual time of enumeration of each individual farm. Data for acres, production, and sales of crops relate generally to the crops harvested during the crop year 1959, regardless of whether and when they were sold while data for sales of livestock and livestock products relate to the calendar year 1959. Since the enumeration was made before the end of 1959, special emphasis was placed upon the inclusion of estimates for crops yet to be sold and for livestock and livestock products expected to be sold in the period from the time of enumeration to the end of the calendar year. Instructions on the questionnaire and the wording of questions were designed to assure that full crop-year or calendar-year data would be reported. For example, "How much of this year's crop was or will be sold?"

ENUMERATION FORMS AND PROCEDURES

Authorization.—Section 5 of Title 13 of the United States Code authorizes the preparation of forms and questionnaires used in the census. It reads as follows:

"The Secretary shall prepare schedules, and shall determine the inquiries, and the number, form, and subdivisions thereof, for the statistics, surveys, and censuses provided for in this title."

The Agriculture Questionnaire.—The questionnaire for the 1959 Census of Agriculture was prepared by the staff of the Bureau. Selection of the inquiries was based on the results of the 1958 pretest and experience gained in earlier censuses. Careful consideration was given to such factors as the current availability

of data from other sources, the possibility of obtaining data by methods other than a census, the adequacy of the data that might be obtained, and the need for and usefulness of the data. Two committees gave advice and counsel to the Bureau. One of these, a Special Advisory Committee, was composed of members designated by the organizations they represented, following an invitation from the Director of the Bureau of the Census to name a representative to serve in an advisory capacity. The Special Advisory Committee for the 1959 Census of Agriculture was made up of one representative from each of the following: Agricultural Publishers Association, American Association of Land-Grant Colleges and State Universities, American Farm Bureau Federation, American Farm Economic Association, American Statistical Association, Farm Equipment Institute, National Association of Commissioners, Secretaries, and Directors of Agriculture, National Council of Farmer Cooperatives, National Farmers' Union, National Grange, Rural Sociological Society, and the U.S. Department of Agriculture. A representative of the Bureau of the Budget was in attendance at all meetings of the Advisory Committee.

Because of the special interest of the U.S. Department of Agriculture in censuses of agriculture, the Director of the Bureau of the Census sought the continuous cooperation of that organization in developing plans, questionnaires, and procedures for the 1959 Census of Agriculture. Working Groups were established in the U.S. Department of Agriculture to make recommendations for the following general subjects:

- Tenure, Land Values, and Mortgage Debt
- Land Use and Conservation and Production Practices
- Field Crops
- Fruits and Vegetables
- Forest Products
- Livestock, Poultry, and Dairy
- Income and Expenditure (including Contractual Operations)
- Farm Labor
- Equipment and Facilities (including Structures)

Each Working Group had the responsibility for ascertaining the U.S. Department of Agriculture's need for data in the field covered by its "terms of reference" and for presenting recommendations to a small Joint Committee comprising representatives of both the Bureau of the Census and the U.S. Department of Agriculture. The Joint Committee received written recommendations from each Working Group. The Chairman of each Group appeared before the Joint Committee as did any member of the Working Group who was needed to present supplemental information of a specialized nature.

Prior to the formulation of the questionnaire, State Agricultural Colleges and other major users of census data were invited to suggest inquiries for the enumeration. Each member of the Special Advisory Committee had the opportunity and the responsibility for channeling in suggestions from the organization he represented. The number of inquiries submitted from all sources greatly exceeded the number that could be included in the census, from the point of view of cost, of the respondent's time and patience, and of practical value to the majority of users of data.

The final selection included 316 questions, some of which consisted of several parts, for the 48 States comprising the conterminous United States. Although each of the 316 questions was asked in one or more of the 48 States, considerably less than this total was asked in any one State because of the use of "State" questionnaires. Moreover, about 50 questions out of the total were asked of approximately one-fifth of all farm operators in the State. The number of questions ranged from 159 on the questionnaire for Maine to 194 on the questionnaire for California. In all, 38 versions of the questionnaire—one for each State or combination of adjoining States and two for Texas—

were used for the 1959 census in the conterminous United States as compared with 21 versions in 1954 and 41 in 1950. A separate version was used in Alaska and another in Hawaii.

Differences in the questionnaires were designed to account for regional and local differences in agriculture. Most, but not all, of the differences related to crops. The use of State questionnaires made possible the inclusion of separate inquiries for all important crops grown within a State and, at the same time, a reduction in the total number of inquiries for a State. Questions that did not apply, to any considerable degree, to a particular State were omitted from the questionnaire used in that State. For example, separate questions about citrus fruits were omitted from all questionnaires except for the few States where citrus fruits are grown. An added advantage of State questionnaires was that production and sales data could be asked in the unit of measure most commonly used by the farmers in each State. Regional variation in the number and type of questions is an important provision of the census for obtaining complete coverage of agricultural operations.

About 2 weeks before the start of the enumeration, agriculture questionnaires were mailed to most households in rural areas. A letter was attached to each questionnaire asking the farm operator to fill the questionnaire and to give it to the enumerator when he called. The purpose of this procedure was to save time and money in taking the census and to improve the quality of the information given by farm operators. By having the questionnaire ahead of time, the farmer could determine what information would be required and could check his records in advance of the enumerator's visit. It was, however, the responsibility of the enumerator to obtain an agriculture questionnaire for each place which qualified. If the questionnaire had been filled out by the farm operator, the enumerator was instructed to examine the questionnaire for completeness and accuracy and, if need be, to give the farmer such help as might be necessary.

Agricultural Operations.—The training of enumerators stressed the concept that a census of agriculture is a census of agricultural operations rather than a census of farms. This concept was intended to assure a complete agricultural census free of any personal judgment by enumerators as to what constitutes a farm. In accordance with clearly defined procedures, an enumerator was required to obtain an agriculture questionnaire for each person who had charge of one or more agricultural operations, whether or not he considered himself to be a farm operator. For enumeration purposes, it was considered that there were agricultural operations on a place if, at any time in 1959—

- a. Any livestock (hogs, cattle, sheep, goats, horses, or mules) were kept on the place.
- b. A combined total of 20 or more chickens, turkeys, and ducks were kept on the place.
- c. Any grain, hay, tobacco, or other field crops were grown on the place.
- d. A combined total of 20 or more fruit trees, grapevines, and nut trees were on the place.
- e. Any vegetables, berries, or nursery or greenhouse products were grown on the place for sale.

As a result of the requirement that all places having agricultural operations be enumerated, more questionnaires were obtained than are included in the tabulations for farms. During the office processing operations that followed the completion of enumeration, criteria were applied to the questionnaires to sort out for tabulation those that represented farms according to the census definition of a farm (see page XIV)

Enumeration Assignments and Enumeration Districts.—To assure a complete enumeration within the time allotted, the United States (excluding Alaska and Hawaii) was divided into 29,374 Enumeration Assignments, or EA's. Each EA comprised an

area that one enumerator could reasonably be expected to canvass within a 3- to 4-week period, as indicated by performance records from the 1954 census.

Each EA was made up of one or more Enumeration Districts, or "ED's," as the geographic unit for enumeration. Prior to the enumeration, the ED's were classified into three groups on the basis of the density of dwellings in relation to the number of farms, as indicated by the 1954 Census of Agriculture, the 1950 Census of Population and Housing, current population estimates, and highway maps showing culture which were basic to establishing the boundaries of each assignment. Through the use of different canvassing procedures for each group of ED's, the Bureau was able to reduce the cost of enumeration without running any material risk of missing any farms or other places with agricultural operations. The ED groupings and canvassing procedures are described below.

Group I Enumeration Districts.—In general, ED's with no well-defined cluster of dwellings were considered to be open-country areas and comprise Group I. For each ED of Group I, in his Enumeration Assignment, the enumerator was required to list in his Record Book the name of every head of household living in the ED and also the name of every person not living in the ED who had agricultural operations there. There were approximately 20,751 ED's in Group I for the 1959 Census.

Group II Enumeration Districts.—Rural ED's in which the number of dwellings was large in relation to the number of farms were considered to be in Group II. For each ED, in Group II, the enumerator was required to list the head of the household for all dwellings in the ED except for those on less than one acre of ground in built-up residential areas of 50 or more dwellings. He was also required to determine, by observation or local inquiry, whether there were any farms or other places with agricultural operations in the built-up areas and, if so, to obtain an agriculture questionnaire. There were approximately 7,979 ED's in Group II.

Group III Enumeration Districts.—Most incorporated places and uninhabited villages having approximately 150 or more dwellings were designated as separate ED's and are classified as Group III. Also, most ED's in counties around large metropolitan areas were designated as Group III ED's. Prior to the 1959 Census of Agriculture, places enumerated in these areas during the 1954 Census of Agriculture were listed in the Enumerator's Record Book. The enumerator was required to visit and enumerate or otherwise account for each place listed in his Record Book. In addition, he was instructed to ask at each of these places if there were any farms or other places with agricultural operations in the Enumeration District, and, if so, to add them to his list and enumerate them. There were approximately 15,836 Group III ED's in 1959. According to the 1954 Census, these ED's contained 380,577 farms.

A few enumeration districts that comprised incorporated places or that were within an incorporated city were classified as Group I or Group II because they had a large number of farms. A few others, comprising extensive rural districts requiring considerable travel, were classified as Group III because they had only a small number of farms.

Enumerator's Record Book.—Each enumerator received one or more Record Books containing a listing form for use during canvassing. (See appendix for facsimile of one page of listing form included in Enumerator's Record Book.) The lines on the listing form were numbered in consecutive order. Except as otherwise prescribed for Group II and Group III ED's, the enumerator listed in his Record Book the name of each head of household living in his assigned area and also the name of each person not living in his area who had agricultural operations there. As he made his listing, he also asked the questions about agricultural operations that were printed on the listing form. Answers to these questions determined, for the enumerator, whether or not an agriculture questionnaire was required for the person listed and, if so, whether he or some other enumerator was responsible for getting it. Thus, the Record Book served as an important aid to the enumerator in securing complete coverage of all agricultural operations within his area. At the same

time, it helped to prevent enumeration of the same place by two or more enumerators.

Enumeration Maps.—As a second aid to getting complete coverage, each enumerator received a map or, in a few exceptional cases, a brief written description of the area assigned to him for enumeration. He was required to plan and follow an orderly route of enumeration within the boundaries of his assigned area in accordance with established canvassing procedures. As the enumerator listed a place in his Record Book, he indicated its location by copying onto his map the number of the line on which he listed it. This numbering system indicated the enumerator's route of travel, and helped both the enumerator and his crew leader to determine the extent of coverage of the enumerator's assignment at any given time.

Lists of Special and Large Farms.—Prior to the enumeration, a card list of "special and large farms" was prepared on the basis of records obtained from the 1954 census and from Federal and State agricultural agencies. In general, "special and large farms" fell into one of three categories: (1) farms having unusually large acreages, livestock inventories, or annual sales as indicated by available records; (2) farms known to be specializing in such operations as broiler production, turkey growing, feed lots, nursery or greenhouse production, cranberry bogs, citrus groves, etc.; (3) farms that might easily be overlooked because they had absentee operators or were not locally thought of as farms, such as institutions, Indian reservations, grazing associations, etc.

Enumerators were given the cards for the special and large farms within their assignment areas to use as aids to obtaining complete coverage. Generally, the cards provided insurance against the omission of farming units that could have a significant effect on the totals for a given county or State. The enumerator was instructed to obtain an agriculture questionnaire for each special or large farm in his area or to write an explanation on the card as to why an agriculture questionnaire was not required on the basis of 1959 operations. The crew leader had a duplicate set of cards for use in checking enumeration coverage.

Landlord-Tenant Questionnaire.—As in several previous censuses, a special landlord-tenant questionnaire was used in some parts of the South as a supplement to the agriculture questionnaire. Its purpose was to help the enumerator get complete and accurate coverage of individually operated tracts of land that were actually part of one operating unit under the control of one landlord. To accomplish this purpose, the enumerator was required to fill a landlord-tenant questionnaire for each landlord who had any land worked on shares. The entries made in this questionnaire included the name of each sharecropper, tenant, or renter; the amount of land assigned to each; and the acreage and quantity of crops harvested on shares. By checking these entries against the agriculture questionnaires obtained for the individual operators, the enumerator and the Central Office could verify that each part of the operating unit controlled by the landlord was enumerated and that it was enumerated only once. The landlord-tenant questionnaire was used in 386 counties in the 1959 census as compared with approximately 900 counties in 1954.

Township Sketch Map.—In some areas of the Great Plains, a considerable portion of land is farmed by nonresident operators—that is, by persons who do not live on the land they operate or who live on it only during part of the year. Enumerators in these areas used a special mapping form, the Township Sketch, in addition to their enumeration maps as an aid to obtaining complete coverage. Each township included on the sketch was identified by township and range number and was divided into 144 small squares. In a standard section of 640 acres, each square represented a quarter section of land, or 160 acres. As the enumerator canvassed his assignment area, he indicated the acreage and location of each farm, ranch, and tract of nonfarm

land by drawing its boundaries on the sketch. He also used a simple numbering system as a cross reference between the agricultural land identified on the sketch and the questionnaire on which it was reported. The Township Sketch was used in all counties of North Dakota and South Dakota and in selected counties of Colorado, Kansas, Minnesota, Montana, Nebraska, New Mexico, Oklahoma, and Wyoming.

Field Review of Enumerator's Work.—In the 1959 census, greater emphasis was placed on a detailed review of enumerators' work during enumeration than had been the case in previous censuses. The objective was to detect and correct enumeration errors as early as possible in order to achieve and maintain a high quality of individual performance. Starting on the first day of enumeration and continuing throughout the enumeration period, each crew leader was instructed to make regular and frequent visits to his enumerators. At each visit, he was to follow a clearly defined procedure for observing the enumerator's conduct of interviews and for checking his listings, maps, questionnaires, and other forms for accuracy and completeness.

As an aid to checking coverage and enumerator efficiency, the crew leader was given a list containing estimates, based on the 1954 census, of the number of questionnaires required in each enumeration assignment area within his district, and of the mileage and time required to obtain those questionnaires.

SAMPLING

Use of Sampling.—In the 1959 census, as in several previous censuses, sampling was used in two ways: for enumeration and for tabulation. Sampling in enumeration consisted of the collection of information about the items included in sections IX through XV of the questionnaire for only a sample of farms. The "sample" items relate to sales of dairy products and sales of livestock, use of fertilizer and lime, farm expenditures, land-use practices, farm labor, equipment and facilities, rental agreements, farm values, and farm mortgage debt. The same sample of farms was used for tabulations by type of farm and by economic class of farm and for many of those by size of farm and by color and tenure of operator.

Description of the Sample.—The sample used for the 1959 Census of Agriculture consisted of all farms with a total area of 1,000 or more acres or with estimated sales of \$100,000 or more in 1959, and approximately 20 percent of all other farms. Farms with 1,000 or more acres were universally included in the sample during enumeration. As the enumerator filled the questionnaire, he determined the number of "acres in this place" (see question 7 of the agriculture questionnaire). If the acreage amounted to 1,000 or more he was required to fill sections IX through XV of the questionnaire. Farms with less than 1,000 acres, with estimated sales of \$100,000 or more, were included in the sample during the office processing. For these farms the information for sections IX through XV was obtained by mail.

The selection of farms of less than 1,000 acres for inclusion in the sample was made during enumeration, according to the following procedure: As the enumerator determined that he was required to obtain a questionnaire, he assigned a number to it, whether or not he was able to obtain the questionnaire on his first visit. He assigned numbers in consecutive order, beginning with "1" for the first questionnaire required in each enumeration district within his area. He was instructed to fill sections IX through XV on all questionnaires for which the assigned number ended in "2" or "7" (i.e. 2, 7, 12, 17, 22, etc.).

Adjustment of the Sample.—An adjustment in the part of the sample that was comprised of farms of less than 1,000 acres and with estimated sales of less than \$100,000 was made by a process essentially equivalent to stratifying the farms in the sample by

size of farm. The purpose of this adjustment was to improve the reliability of the estimates based on the sample and to reduce the effects of possible biases introduced by enumerators who deviated from the prescribed procedure for selecting the sample farms. The adjustment procedure was carried out for "blocks" of counties, each consisting of from one to ten counties in a State. To adjust the sample, separate counts were made for each county, and for the block of counties of all farms and of farms in the sample for each of 10 size-of-farm groups based on the "acres in this place" (question 7). The 10 size-of-farm groups were as follows: under 10 acres, 10 to 49 acres, 50 to 69 acres, 70 to 99 acres, 100 to 139 acres, 140 to 179 acres, 180 to 219 acres, 220 to 259 acres, 260 to 499 acres, and 500 to 999 acres. Farms of less than 1,000 acres, but with value of sales of \$100,000 or more, were excluded from these counts. For each size-of-farm group, the number of farms in the sample for the block of counties was adjusted to make it equal or approximately equal to the total number of farms divided by five. This was accomplished for each group by the elimination or duplication on a random basis, of farms in those counties where the difference between the actual proportion in the sample and the expected 20 percent was in the same direction as the difference for the block of counties.

Estimation of Totals for the Sample.—For the items included in the sample part of the questionnaire (sections IX through XV), estimated totals for all farms were derived from the tabulated totals for the farms in the adjusted sample. First, item-by-item totals, as tabulated for that part of the sample comprising farms of less than 1,000 acres and with estimated sales of less than \$100,000, were multiplied by 5. These estimated item-by-item totals were then added to the corresponding item totals, as tabulated, for all farms of 1,000 acres and over and farms with estimated sales of \$100,000 and over. The resulting values represent the estimated totals for all farms.

Presentation of Sample Data.—In tables where a small amount of data based on the sample farms is presented together with data for all farms, the data based on the sample are printed in italics. Other tables contain headnotes explaining that most of the data are estimates based on reports for only a sample of farms.

Reliability of Estimates.—The estimated totals for all farms of the items enumerated for only the sample farms are subject to sampling errors. The estimated totals obtained by making tabulations for only the farms included in the sample are also subject to sampling errors. State tables 23 and 24 contain approximate measures of the sampling reliability of the estimates for numbers of farms reporting and for item totals. While these measures indicate the general level of sampling reliability of the estimates, they do not completely reflect errors arising from sources other than sampling; for example, errors in the original data reported by farmers. Errors arising from sources other than sampling may, in some instances, be relatively more important than sampling variation, especially for county totals.

The general level of sampling reliability of estimated totals may be determined from the data in State tables 23 and 24. State table 24 contains a list of items, together with a figure for each item indicating one of the four levels of sampling reliability that are presented in State table 23. For each item the sampling error according to the number of farms reporting may be determined from State table 23, in the column for the level of sampling reliability designated in State table 24. To determine the sampling reliability for any item, reference must be made to State table 24 to find out which of the four levels of sampling reliability given in State table 23 should be used, and also the appropriate county or State table to obtain the number of farms reporting the item.

As explained in State table 23, the level of sampling reliability designated as level 1 should always be used to determine the sampling reliability of estimated numbers of farms or of farms reporting.

State table 23 shows percentage limits such that chances are about 68 out of 100 that the difference between an estimate based on the sample and the figure that would have been obtained from a tabulation of all farms would be no more than the percentage specified for the estimated number of farms reporting that item. The chances are about 99 out of 100 that the difference would be less than $2\frac{1}{2}$ times the percentage specified.

As indicated by the percentages in State table 23, the smaller the number of farms reporting a given item, the larger the relative sampling error in the estimated total for that item. Even so, considerable detail is presented for each item, by several classifications of farms, in order to permit the appraisal of estimates for various combinations of items not shown in this report. Percentages and averages that may be derived from the tables will generally have greater relative reliability than the corresponding estimated totals. However, significant patterns of relationships may be observed in the estimated totals even though the individual data are subject to relatively large sampling errors.

The data representing estimates based on a sample of farms for the 1954 census were obtained in essentially the same way as in 1959. Therefore, State tables 23 and 24 may also be used to determine the sampling errors for the 1954 data.

Differences in Data Resulting From Differences in Tabulating Procedures.—Many of the figures in the detailed State tables represent estimates obtained by tabulating only the sample farms. The totals for these detailed distributions will generally differ somewhat from totals presented in other tables obtained from different distributions which were tabulated on a 100 percent basis. Moreover, although most of the figures presented by counties were obtained from tabulations of all farms, the data in county table 4 for commercial farms, and all of the data in the county tables on dairy products and livestock sold, fertilizer and lime, farm expenditures, land-use practices, farm labor, facilities and equipment, and value of land and buildings were estimated for each county on the basis of data tabulated for the farms in the sample. The State totals in the county tables for these items, though based also on the sample, were obtained in a different series of tabulating runs, and so may differ slightly from totals presented in some State tables. For reasons of economy the sample distributions were not adjusted to the 100 percent totals even when such totals were available, nor were slight discrepancies resulting from different runs of the sample data always reconciled unless the differences were large enough to affect the usefulness or reliability of the data.

PROCESSING OPERATIONS

Completion of Enumeration.—As an enumerator completed his assignment, he turned the portfolio containing questionnaires and other census materials over to his crew leader. After making a final review of the enumerator's work, the crew leader mailed the portfolio to the Agriculture Processing Office at Parsons, Kansas. There, each enumerator portfolio was thoroughly checked for completeness of all required forms and for correct application of the sampling procedure.

Editing of Questionnaires.—Each agriculture questionnaire was individually edited and coded before the information was transferred to punch cards and tabulated. As the first major step in the editing process, questionnaires that did not represent farms according to the census definition were withdrawn from fur-

ther processing. (See p. XIV.) As the second major step, the remaining questionnaires were examined for errors, omissions, and inconsistencies. Among the specific items subjected to consistency checks were the following:

- a. Total acreage compared with its distribution by use.
- b. Acreage of individual crops harvested compared with total cropland harvested.
- c. Irrigated acreage compared with total acres in the farm.
- d. Total acreage of individual crops for all purposes compared with the acreage harvested for specific purposes.
- e. Quantity of crops harvested in relation to acreage harvested.
- f. Sales in relation to production and, for livestock, to inventories.
- g. Total livestock compared with the inventory by age and sex.
- h. Expenditures compared with production and inventories.

Obvious errors in calculations or in units of measure, and misplaced entries were corrected as they were found. Entries not clearly legible were rewritten. Many omissions or inconsistencies were disregarded during editing. Those of significant magnitude could be and were handled more efficiently and economically during mechanical processing operations. Questionnaires containing major inconsistencies and omissions were referred to members of the technical staff for review. Depending on the magnitude of the data involved, the technical staff corrected (or supervised the correction of) the questionnaires either on the basis of information reported for other farms of similar type in the area or on the basis of additional information received in response to letters directed to the farm operators.

Coding of Questionnaires.—Most of the numerical information on a questionnaire was self-coding in that the inquiry number was utilized for the item identification on punch cards or on tabulations runs. However, some manual coding was also necessary for such items as irrigated crops for selected States, crops infrequently reported, miscellaneous poultry, etc. Code numbers were entered on questionnaires to classify farms and, in some cases, to identify data for individual items. All farms were coded by size of farm in terms of total acreage, by race, and by tenure of operator. Farms in the 17 Western States, Louisiana, and Hawaii were also coded on the basis of irrigated cropland and irrigated pasture. Additional codes were applied to all farms included in the sample to classify them by type of farm and by total value of agricultural products sold. Individual items were coded only where reports were received for crops or poultry not covered by separate inquiries on the questionnaire. This coding was necessary to assure inclusion of the data in the appropriate farm product totals.

Tabulation of Data.—After the questionnaires were edited and coded, the information on them was punched on cards. The cards were then mechanically sorted and fed into machines which transferred the data to tabulation sheets. One of the initial and primary steps in the machine handling of the punch cards was to separate and list those cards which lacked necessary information, those which contained inconsistent or impossible data, and those on which the data were possible but of such magnitude that a further review of the individual questionnaires was warranted. The listing sheets were examined and, as necessary, the cards were corrected. When the cards for a particular county were considered satisfactory, the data were tabulated.

Subject-matter specialists of the Bureau and the U.S. Department of Agriculture examined all tabulations for reasonableness and consistency. As necessary, they made corrections on the basis of a further review and reappraisal of the original reports and verification of the editing, coding, and punching.

PRESENTATION OF STATISTICS

Statistical Content of This Report.—This report is part of Volume I of the 1959 Census of Agriculture. Volume I consists of 54 parts, each part containing information about agriculture for a single State, Commonwealth, or Possession. Each part contains county data for that particular State or area. The term "county," as used in this report embraces election districts in Alaska, parishes in Louisiana, municipios (municipalities) in Puerto Rico, etc. The statistics for 1959 were obtained from the Census of Agriculture taken in the "conterminous United States" (see following paragraph), Hawaii, and Puerto Rico during the period October 1959 to January 1960 and in Alaska, American Samoa, Guam, and Virgin Islands as of April 1, 1960. Comparative data for years prior to 1959 were obtained from earlier censuses.

In the planning of the publications for the 1960 Censuses of Population and Housing and the 1959 Census of Agriculture, the term "conterminous United States," recommended by the Board of Geographic Names to designate the 48 State area as it existed before Alaska and Hawaii became States, was adopted by the Bureau of the Census.

The definitions and explanations in this introduction for volume I generally have application broad enough to include the States of Alaska and Hawaii, and the Commonwealth of Puerto Rico and the island possessions. However, specific application in many instances may be limited to the conterminous United States; for example, references to earlier censuses, to the sampling methods and procedures, to specific sections or questions on the questionnaires, and to specific table numbers.

For each part of volume I (one part for each State or area), a facsimile of the appropriate questionnaire is reproduced in the appendix.

The statistics for States and counties are presented according to the same general plan as was followed in the volume I reports for the 1954 and the 1950 censuses. State and county totals are given for nearly all items for which information was obtained in the 1959 census. However, most of the data by economic class of farm, type of farm, and color and tenure of farm operator are given only for States.

Comparative data for the States are given for each census year beginning with 1920. Comparative data for counties are given for the years 1959 and 1954. For some items, the data obtained from the 1959 census are the only ones available. For comparative purposes 1950 data are carried in county table 6 for the kind of road on which farms were located.

Comparability of Data.—The data obtained from the various censuses of agriculture are not strictly comparable for all items. For example, differences from one census to another in the time of enumeration, the wording of the questions, and the definition of a farm cause some lack of comparability. Differences considered to have a significant effect on the comparability of data are described in the text and/or mentioned in footnotes to the tables.

Minor Civil Divisions.—As in prior censuses, data for most of the items included in the 1959 Census of Agriculture were tabulated for minor civil divisions. The term "minor civil division" applies to the primary subdivision of a county into smaller geographic areas such as townships, precincts, districts, wards, beats, municipalities, etc. Figures for these smaller geographic areas are not included in any of the published reports, but they may be supplied upon request and payment of the costs of compiling and checking the data.

Prior to the 1954 Census, an enumeration assignment did not include more than one minor civil division, even in cases where the township, precinct, etc., did not have enough farms to provide a full workload for an enumerator. In 1954, and again in 1959,

the aim was to make enumeration assignments large enough to keep each enumerator fully occupied in his area for a 3- to 4-week period. Hence, in some areas, two or more adjoining minor civil divisions were combined into one enumeration assignment. An enumeration assignment never comprised the whole of one minor civil division and a part of another, nor a part of two or more minor civil divisions. A minor civil division that included too many farms for one enumerator to cover during the enumeration period was divided into two or more enumeration assignments.

In some cases, the minor civil division tabulations provide totals for a single minor civil division, even when such totals required a grouping of enumeration assignments. In other cases, the minor civil division tabulations provide totals for a combination of two or more adjoining minor civil divisions. The data for each individual minor civil division included in such totals can be tabulated separately, however, since each questionnaire obtained in the census contains the designation of the minor civil division in which the farm headquarters was located. An additional charge must be made for a separate tabulation of any small area included in a total for two or more combined minor civil divisions.

Requests for census information for minor civil divisions should be directed to the Agriculture Division, Bureau of the Census, Washington 25, D.C.

DEFINITIONS AND EXPLANATIONS

Descriptive Summary and References.—The definitions and explanations that follow relate only to those items that are considered to be inadequately described in the tables where they appear. Although the descriptive terms and explanations refer specifically to the 1959 Census of Agriculture, many of them also apply to earlier censuses. Most of the definitions consist of a résumé of the questionnaire wording, supplemented by excerpts from instructions given to enumerators. For exact wording of the questions and of the instructions included on the questionnaire, see the facsimile of the 1959 Agriculture Questionnaire in the appendix of this report.

An analysis of the questions asked in the 1959 census, and of the data obtained, is given in Volume II, General Report, Statistics by Subjects, United States Census of Agriculture, 1959. The general report presents statistics for States by subject matter.

GENERAL FARM INFORMATION

Census Definition of a Farm.—For the 1959 Census of Agriculture, the definition of a farm was based primarily on a combination of "acres in the place" and the estimated value of agricultural products sold.

The word "place" was defined to include all land on which agricultural operations were conducted at any time in 1959 under the control or supervision of one person or partnership. (For definition of "agricultural operations," see p. X.) Control may have been exercised through ownership or management, or through a lease, rental, or cropping arrangement.

Places of less than 10 acres in 1959 were counted as farms if the estimated sales of agricultural products for the year amounted to at least \$250. Places of 10 or more acres in 1959 were counted as farms if the estimated sales of agricultural products for the year amounted to at least \$50. Places having less than the \$50 or \$250 minimum estimated sales in 1959 were also counted as farms if they could normally be expected to produce agricultural products in sufficient quantity to meet the requirements of the definition. This additional qualification resulted in the inclusion as farms of some places engaged in farming operations for the first time in 1959 and places affected by crop failure or other unusual conditions.

To avoid biases arising from an enumerator's personal judgment and opinion, the Bureau did not give enumerators the defini-

tion of a farm. Instead, enumerators were instructed to obtain questionnaires for all places considered farms by their operators and for all other places that had one or more agricultural operations. (See "Agricultural Operations", p. X.) In 1954, enumerators were instructed to fill questionnaires on the same basis as in 1959. In 1950, agricultural operations were defined to include every place of 3 or more acres, whether or not the operator considered it a farm, and every place having "specialized operations", regardless of the acreage. "Specialized operations" referred to nurseries and greenhouses and to places having 100 or more poultry, production of 300 or more dozen eggs in 1949, or 3 or more hives of bees. In all of the three last censuses, as a result, questionnaires were filled for a considerable number of places that did not qualify as farms. The determination as to which questionnaires represented farms was made during office processing operations and only those questionnaires meeting the criteria for a farm were included in the tabulations.

For both the 1950 and 1954 Censuses of Agriculture, places of 3 or more acres were counted as farms if the annual value of agricultural products, whether for home use or for sale but exclusive of home-garden products, amounted to \$150 or more. Places of less than 3 acres were counted as farms only if the annual sales of agricultural products amounted to \$150 or more. A few places with very low agricultural production because of unusual circumstances, such as crop failure, were also counted as farms if they normally could have been expected to meet the minimum value or sales criteria.

In the censuses from 1925 to 1945, enumerators were given a definition of "farm" and were instructed to obtain reports only for those places which met the criteria. According to this definition, farms included all places of 3 or more acres, regardless of the quantity or value of agricultural production, and places of less than 3 acres if the value of agricultural products, whether for home use or for sale, amounted to \$250 or more. Because of changes in price level, the \$250 minimum resulted in the inclusion of varying numbers of farms of less than 3 acres in the several censuses taken during this period. Generally, the only reports excluded from tabulation were those taken in error and those showing very limited agricultural production, such as only a small home garden, a few fruit trees, a small flock of chickens, etc. In 1945, reports for places of 3 acres or more were tabulated only if at least 3 acres were in cropland and/or pasture or if the value of products in 1944 amounted to at least \$150.

The decrease in the number of farms in 1950 and 1954, as compared with earlier censuses, was partly due to the change in farm definition, especially with respect to farms of 3 or more acres in size. Some of the places of 3 or more acres that were not counted as farms in 1950 and 1954 because the value of their agricultural production was less than \$150 would have qualified as farms if the criteria had been the same as in earlier censuses.

For 1959, the decrease in the number of farms as compared with all prior censuses resulted partly from the change in farm definition. The fact that sales of agricultural products in 1959 was used resulted in the exclusion of some places that would have qualified as farms had the value of agricultural products alone been considered. The increase in the acreage minimum also had an effect. The reduction in the number of farms due to change in definition, 1954 to 1959, is shown for each county in county table 1. Some characteristics of the places not counted as farms in 1959, but which would have been included in 1954, are shown in State table 10.

The change in farm definition made in 1950 and again in 1959 had no appreciable effect on the totals for livestock or crops because the places affected by the change ordinarily accounted for less than 1 percent of the totals for a given county or State.

For the States that comprise the conterminous United States, two figures are published for each county on the number of farms

in 1959. One is an actual count of all farms and the other is an estimate based on the number of farms included in the sample. For almost every county there is a difference between the actual number of farms and the estimated number of farms. Because of sampling procedure and sampling variability, the number of farms in the sample seldom agrees exactly with the actual number of farms. For most counties, the actual number of farms in the sample was either more or less than precisely 20 percent of all farms. Similarly, totals estimated on the basis of data for the sample farms may be slightly more or slightly less than the actual totals that would have been obtained had the data been tabulated for all farms. Therefore, the estimated number of farms reporting certain items may, in some instances, be greater than the total number of farms shown in county table 1. However, the estimated number of farms is given in county tables 5 and 6 so that estimates based on the sample farms may be related to the estimated rather than the actual number of farms.

Farm Operator.—The term "farm operator" is used to designate a person who operates a farm, either doing the work himself or directly supervising the work. He may be the owner, a member of the owner's household, a hired manager, or a tenant, renter, or sharecropper. If he rents land to others or has land worked on shares by others, he is considered as operator only of the land which he retains for his own operation. In the case of a partnership, only one partner is counted as an operator. The number of farm operators is considered to be the same as the number of farms.

Farms Reporting or Operators Reporting.—Figures for farms reporting or operators reporting, based on a tabulation of all farms, represent the number of farms, or operators, for which the specified item was reported. For example, if there were 1,922 farms in a county and only 1,465 had chickens 1 month old and over on hand at the time of enumeration, the number of farms reporting chickens would be shown as 1,465. The difference between the total number of farms and the number of farms reporting a particular item represents the number of farms not having that item, provided a correct report was received for all farms.

Where applicable, figures may be given for the number of farms or operators not reporting items that were intended to be obtained for all farms; for example, residence of farm operator, State table 1. The number not reporting, as compared with the total number of farms or operators, indicates the extent of incompleteness of the reporting of the data for the item.

Land Area.—The approximate total land area of States and counties as reported for 1959 is, in general, the same as that reported for all censuses beginning with 1940. Such differences as are shown reflect political changes in boundaries or actual changes in land area caused by changes in the number or size of reservoirs, lakes, streams, etc. For Alaska, the areas for election districts represent the gross area of land and water.

Land in Farms.—Except for managed farms, the land to be included in each farm was determined from the answers to questions about the number of acres owned, the number of acres rented from others or worked on shares for others, and the number of acres rented to others or worked on shares by others. The acres owned and the acres rented from others or worked on shares for others were first added together and then the acres rented to others or worked on shares by others were subtracted. The result represented the number of acres in the farm. The number of acres in a managed farm was the difference between the total land managed and that part of the managed land that was rented to others or worked on shares by others.

In the 1959, 1954, and 1950 censuses, enumerators were instructed to record total figures for land owned, land rented from others, and land managed for others, including any part of the land that was rented to others. In censuses prior to 1950, enu-

merators were instructed to exclude all land rented to others and to record only that portion of the acreage owned, rented from others, or managed for others that was retained by the farm operator. Thus, the figures for the individual tenures of land are not entirely comparable for all censuses. However, the land included in each farm was determined on essentially the same basis for all censuses.

The acreage designated in the tables as "land in farms" consists primarily of "agricultural" land—that is, land used for crops and pasture or grazing. It also includes considerable areas of land not actually under cultivation nor used for pasture or grazing. For example, the entire acreage of woodland and wasteland owned or rented by farm operators is included as land in farms, unless it was being held for nonagricultural purposes or unless the acreage was unusually large. For 1959 and 1954, if a place had 1,000 or more acres of woodland not pastured and wasteland, and if less than 10 percent of the total acreage in the place was used for agricultural purposes, the acreage of woodland not pastured and wasteland was reduced to equal the acreage used for agriculture. The procedure used in 1950 for excluding unusually large acreages of woodland not pastured and wasteland differed slightly from the one used in 1959 and 1954. In 1950, adjustments were made in places of 1,000 or more acres (5,000 or more in the 17 Western States), if less than 10 percent of the total acreage was used for agricultural purposes.

Except for open range and grazing land used under government permit, all grazing land was to be included as land in farms provided the place of which it was a part was a farm. Grazing land operated by Grazing Associations was to be reported in the name of the person chiefly responsible for conducting the business of the Association. Land used rent free was to be reported as land rented from others. All land in Indian reservations that was used for growing crops or grazing livestock was to be included. Land in Indian reservations that was not reported by individual Indians and that was not rented to non-Indians was to be reported in the name of the cooperative group that used the land. In some instances, an entire Indian reservation was reported as one farm.

Land owned.—All land that the operator and/or his wife held under title, purchase contract, homestead law, or as heir or trustee of an undivided estate at the time of enumeration is considered as owned.

Land Rented from Others.—This item includes not only land that the operator rented or leased from others but also land he worked on shares for others and land he occupied rent free. Grazing land used under government permit or license is not included.

Land Rented to Others.—This item includes all land rented or leased to others, except land leased to the government under the Soil Bank, and all land worked by others on shares or on a rent-free basis. For the most part, the land rented to others represents agricultural land but it also includes land rented for residential or other purposes. The tenant or sharecropper is considered as the operator of land leased, rented, or worked on shares even though his landlord may supervise his operations. The landlord is considered as operator of only that portion of the land not assigned to tenants or croppers.

Land Managed.—This item includes all tracts of land managed for one or more employers by a person hired on a salary basis. A hired manager was considered to be the operator of the land he managed since he was responsible for the agricultural operations on that land and frequently supervised others in performing those operations. Managed land was always to be reported on a separate questionnaire whether or not the manager also operated a farm on his own account.

Land in Two or More Counties.—An individual farm was always enumerated in only one county, even in cases where the land was located in two or more counties. If the farm operator lived on the farm, the farm was enumerated in the county where he lived. If he did not live on the farm, the figures for the farm were tabulated for the county where the farm headquarters was located. In cases where there was any question as to the location of the headquarters, figures for the farm were tabulated for the county where most of the land was located.

Land in Farms According to Use.—Land in farms has been distributed according to the way in which it was used in 1959. The land uses described in the following paragraphs are mutually exclusive; that is, each acre of land is included only once even though it may have had more than one use during the year.

Cropland Harvested.—This category refers to all land from which any crops were harvested in 1959, whether for home use or for sale. It includes land from which hay (including wild hay) was cut and land in berries and other small fruits, orchards, vineyards, nurseries, and greenhouses. Matured crops hogged off or grazed were considered to have been "crops harvested" and were reported here. Land from which two or more crops were harvested in 1959 was to be counted only once in the land-use classification. Land used for other purposes either before or after the crops were harvested was to be reported as cropland harvested, without regard to the other uses.

The enumerator was instructed to check the figure for cropland harvested for each farm by adding the acreages of the individual crops and subtracting the acreages from which two or more crops were harvested. This checking procedure was repeated during the office processing of questionnaires for all farms having 100 or more acres of cropland harvested.

Cropland used only for Pasture.—This land-use classification includes rotation pasture and all other land used only for pasture or grazing that the operator considered could have been used for crops without additional improvement. Enumerators were instructed to include land planted to crops that were hogged off, pastured, or grazed before maturity but to exclude land pastured before or after hay or other crops were harvested from it. Permanent open pasture may have been reported either for this item or for "other pasture" depending on whether or not the operator considered it as cropland.

The figures for 1917 and earlier censuses are not entirely comparable with those for the last three censuses. For 1945, the figures include only cropland used solely for pasture in 1944 that had been plowed within the preceding seven years. The figures for 1940, 1935, and 1925 are more nearly comparable with those for 1959, 1954, and 1950, however, because they include land pastured that could have been plowed and used for crops without additional clearing, draining, or irrigating.

Cropland not Harvested and not Pastured.—This classification represents a total of three subclasses for the 17 Western States and two subclasses for other States.

Cultivated Summer Fallow.—This subclass of land is shown only for the 17 Western States. It refers to cropland that was plowed and cultivated but left unseeded for the 1959 harvest in order to control weeds and conserve moisture.

Soil Improvement Grasses and Legumes.—For the 1959 census, land used only for cover crops to control erosion or to be plowed under for green manure is tabulated separately from "other cropland". After the establishment of the Soil Bank, land that would normally have been used for other purposes was frequently planted to soil-improvement crops. In counties where large acreages were placed in the Soil Bank, the total of land used for soil-improvement crops plus "other cropland" may be considerably larger than the "other cropland" shown for previous censuses.

Other Cropland.—This subclass includes idle cropland, land in crops intended for harvest after 1959, and cropland not harvested because of complete crop failure, low prices, labor shortage, or other reasons. The 1959 figures for "other cropland" are not entirely comparable with those for previous censuses since they do not include land used only for soil-improvement crops. (See preceding paragraph.)

Woodland Pastured.—This classification includes all woodland where livestock were pastured or grazed in 1959. The instruction on the questionnaire—"Include as woodland all wood lots and timber tracts; cutover and deforested land which has value for wood products and has not been improved for pasture"—represents a somewhat more precise definition than the corresponding instruction contained on the 1954 questionnaire. No definition of woodland was given in 1950 apart from an instruction to enumerators not to include brush pasture as woodland. Some of the changes in woodland acreages from one census to another may merely represent differences in interpretation as to what constitutes "woodland."

Woodland not Pastured.—This classification refers to all woodland not used for pasture or grazing in 1959, including land in operated farms that was placed in the Soil Bank and planted to trees. Unusually large tracts of timberland that were reported as woodland not pastured were excluded from

the tabulation of land in farms when it was evident that such land was held primarily for nonagricultural purposes.

Other Pasture.—This classification refers to all land other than woodland and cropland that was used only for pasture or grazing in 1959. It includes noncrop open or brush pasture and cutover or deforested land that has been improved and used for pasture. The figures for the last three censuses are comparable but those for 1945 include all nonwoodland pasture that had not been plowed during the preceding seven years. For the 1940 census and earlier years, the figures are more nearly comparable with those for the last three censuses. However, the classification may be somewhat less inclusive because land that could have been plowed and used for crops without additional clearing, draining, or irrigating was classified as plowable pasture and included with "cropland used only for pasture".

Improved Pasture.—This subclass refers to that portion of "other pasture" on which one or more of the following practices had been used: liming, fertilizing, seeding, irrigating, draining, or the clearing of weed or brush growth. The figures are comparable with those for 1954, when the question on improved pasture was asked for the first time.

Other Land.—This classification refers to all land not included in the preceding land-use classifications, such as house lots, barn lots, lanes, roads, ditches, land area of ponds, and wasteland. This figure for 1959 was obtained from the machine tabulations by subtracting the total of all other uses from the total land in all farms reported for a given county or classification. Hence, there is no figure given to represent the farms reporting this item.

Value of Land and Buildings.—Only average values of land and buildings per farm and per acre are presented in this report. They are estimates based on data obtained for sample farms. Estimates of the total value of land and buildings by States, geographic divisions, and the United States, are presented in volume II.

The enumerator was instructed to record the market value of the land and the buildings on that land. Market value was defined as the price which the farm operator would expect to receive for the land and buildings if he were to sell them on the day of enumeration.

More problems and difficulties arise in the enumeration of farm real-estate values than in the enumeration of most other agricultural items. Most of the items enumerated require the respondent to make a statement of fact. For example, information about the number and value of farm animals sold alive during the year is based on actual transactions. Similarly, information about livestock inventories relates to the situation existing on a specific place at a specific time. Reports concerning the value of land and buildings, however, are estimates based almost entirely on opinion. The majority of farms have not changed hands for many years and are not currently for sale. For such farms, the operators are not likely to have any clear basis for estimating the value. To make an intelligent and objective estimate, a respondent first needs to make an estimate of the prevailing average market value of farms in his community. Then, he must either add to or subtract from that estimate to allow for the different characteristics of his own farm. In many cases, an operator who would not sell his farm under any circumstances may report an unreasonably high market value. In other cases, a farm operator who acquired his real estate during a period of relatively low prices may estimate an unrealistically low value by current standards. Because of the extent of variation that is known to exist in real estate values, it is difficult to devise checking procedures that will identify inaccurate estimates.

Age of Operator.—Farm operators were classified by age into six age groups. The average age of farm operators was derived from the sum of the ages of all farm operators reporting age divided by the number reporting. The number of farm operators 65 or more years of age is an actual count based on the operators reporting age.

Residence of Operator.—Farm operators were classified by residence according to whether or not they lived on the farms they were operating. Some of those who did not live on the farms they operated themselves lived on farms operated by others. In cases where all the land was rented from others or worked on shares for others, the operator was considered to live on the farm operated provided the dwelling he occupied was included in the rental agreement. The dwelling, in such cases, was not necessarily on the land being operated. Similarly, a farm operator who did not live on the land being cultivated or grazed but who had some agricultural operations (other than a home garden) at his dwelling was considered as living on the farm operated.

Since some farm operators live on their farms only during a part of the year, comparability of the figures for various censuses may be affected by the date of enumeration.

In a few cases, the enumerator failed to report the residence of the farm operator. Differences between the total number of farms and the number of farm operators classified by residence indicate the extent of under-reporting.

Year Began Operating Present Farm.—Enumerators were instructed to report the year during which a farm operator began to operate his present farm and, if the year was 1958 or later, also to report the month. The year was intended to refer to the first year of the period during which the operator had been in continuous charge of his present farm or of any part of it. The time of year that farmers move is indicated by the month they began operating their farms, as shown by a monthly breakdown of the reports for farmers who began operating their present farms during 1958 and 1959.

Off-Farm Work and Other Income.—To obtain a measure of the extent to which farm operators rely on nonfarm sources for part of their income, four questions were asked of all farm operators. The first question asked for the number of days the operator worked off his farm in 1959. The other three questions, to be answered "Yes" or "No," asked (1) whether other members of the operator's household did any work off the farm; (2) whether any income was received from sources other than the sale of agricultural products from the farm operated; and (3) whether the combined income of all members of the household from off-farm work and other sources was greater than the total value of agricultural products sold from the farm operated.

Off-farm work was defined to include work on someone else's farm for pay as well as all types of nonfarm jobs, businesses, and professions, whether the work was done on the farm premises or elsewhere. Exchange work was not included.

The questions asked in the 1959 Census are closely comparable with those asked in 1954. The data for 1959 are actual totals of all operators reporting off-farm work and other income whereas those for 1954 are estimated totals based on the sample.

Equipment and Facilities.—In 1959 as in several earlier censuses, data about specified equipment and facilities were obtained for only a sample of farms. Farm operators were asked to report equipment and facilities that were on the farm at the time of enumeration, regardless of ownership. They were to include items that were temporarily out of order but not any that were worn out.

Data in terms of actual number were obtained for the following items of farm equipment in 1959: (1) grain combines, (2) corn pickers, (3) pick-up balers, (4) field forage harvesters, (5) motortrucks, (6) wheel tractors, (7) garden tractors, (8) crawler tractors, and (9) automobiles. Definitions given enumerators included the following specifications, among others: Corn pickers related to all types of machines used for picking corn, whether used in separate or in combined picking-shelling operations. Pick-up balers were to include both hand-tie and automatic balers but not stationary ones. Motortrucks were to include pick-up trucks and truck-trailer combinations; jeeps and station wagons

were also to be included if they were used primarily as trucks, but school buses were specifically excluded. Wheel tractors specifically excluded garden tractors. Implements with built-in power units, such as self-propelled combines or powered buck rakes, and the power unit of a truck-trailer combination. Automobiles were to include jeeps and station wagons if they were used primarily as passenger cars.

Questions to be answered "Yes" or "No" provided information as to the presence or absence of the following items: (1) telephone, (2) home freezer, (3) milking machine, (4) electric milk cooler, (5) bulk-type milk cooler (in six States only—Michigan, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin), (6) crop drier and (7) power-operated elevator, conveyor, or blower.

Comparable data from one census to another are not available for all items. The questions asked about equipment during a given census reflect changes in farm mechanization and in the facilities available to farm families. Questions about some items of equipment were asked in 1959 for the first time (electric milk cooler, crop drier, bulk-type milk cooler, etc.). Similarly, some questions that were asked in earlier censuses were omitted in 1959. For example, the use of electricity is now so widespread that there is no longer any need for obtaining a count of the farms having it.

Farms by Kind of Road.—The classification of farms by the kind of road on which they are located is based on only a sample of farms. The enumerator was instructed to report, on the basis of his own observation, the kind of road on which the most frequently used entrance to the farm was located. For farms consisting of two or more tracts, he was to limit his report to the tract on which the farm operator had his dwelling or other headquarters.

Farm Labor.—The questions about farm labor were asked only for the sample farms and related to persons working during the calendar week preceding the week of enumeration. Since the enumeration starting dates varied by geographic areas, and the enumeration within each area lasted over a period of several weeks, the calendar weeks to which the data apply also vary. Thus, the data for an individual farm may relate to any one week during the months of October, November, or December, or even, in a few instances, to weeks during September 1959 or January 1960.

Farm labor was defined to include any work, chores, or planning necessary to the agricultural operations of the farm; and to exclude housework, contract construction work, custom machine work, and repair, installation, or construction work done by persons employed specifically for such work. The farm labor information contained in this report represents estimates based on answers to questions relating to the farm work or chores done during the week by (1) operator, (2) unpaid members of the operator's family, and (3) hired persons. An operator was considered as working if he worked one or more hours; unpaid members of the operator's family, if they worked 15 or more hours; and hired persons, if they worked at all during the week.

Data are not fully comparable from one census to another, primarily because of differences in the period to which they relate. In 1954, the data were purposely related to either one of two calendar weeks, depending in part on the starting date set for the enumeration and in part on which week represented a period of peak employment within a given State. For the majority of States, the period specified was the week of September 26–October 2; for other States, the week of October 24–30.

In 1950, as in 1959, the data related to the week preceding the actual enumeration. Unlike 1959, however, enumeration starting dates were identical for all States in 1950 (April 1) but since several weeks were required to complete the enumeration, the calendar week preceding the enumeration was not identical for

all farms. In 1945 and 1935, the number of farm workers related to the first week in January and, in 1940, to the last week in March. In 1945, 1940, and 1935, only persons working the equivalent of two or more days during the specified week were to be included. In 1945 and 1940, an additional specification limited the workers to those 14 years old and over.

Experience gained from earlier censuses indicates that farm labor data are often unsatisfactorily reported unless the week specified is the week immediately preceding the actual enumeration. When a farm operator was asked to report the number of persons employed during a specified week that was several weeks prior to enumeration, he often reported the highest number of persons employed during the year. Obviously incorrect reports were adjusted to make the data reflect more nearly the situation known to exist during the specified week. The farm labor data for 1954 relates to a specified week which, in some cases, was several weeks prior to enumeration. Few adjustments were made in those data, however, even though there were indications of incorrect reporting.

Regular and Seasonal Workers.—Hired persons working on the farm during the week concerned were classed as "regular" workers if the period of actual or expected employment was 150 days or more during the year. They were classed as "seasonal" workers if the period of actual or expected employment was less than 150 days. In cases where the period of employment was not reported for an individual farm, it was estimated from data for such items as basis of payment, wage rates, expenditures for labor in 1959, and type of farming operations.

Hired Workers by Basis of Payment.—Hired persons were also classified according to whether they were paid on a monthly, weekly, daily, or hourly basis, or by piecework. In cases of incomplete reporting, the basis of payment for hired workers was supplied during the office processing operations.

Wage Rates and Hours Worked.—The agreed cash rate of pay was asked for each class of hired worker except those employed on a piecework basis. (The number and the earnings of persons paid on a piecework basis were required for those who worked on Friday of the week preceding the enumeration.) The number of hours that workers were expected to work to earn their pay was asked for each class except those employed on an hourly or piecework basis. For 1959 and 1954, the data include office estimates for farms submitting incomplete reports of wage rates and hours worked. The estimates were consistent with the size and type of operations for the individual farm as compared with similar farms in the area for which complete reports were received. The corresponding data for 1950 apply only to farms that reported both wage rates and hours worked.

Fertilizer and Lime.—The questions about fertilizer and lime, asked only for the sample farms, relate to the acreage on which fertilizer and lime were used and to the quantity used. Farm operators were asked to report total quantities used in 1959 on the farms they operated regardless of when or by whom the fertilizer and lime were purchased. In the South, some landlords who operated farms themselves included the fertilizer and lime they had purchased for use on their tenant-operated land. Such fertilizer and lime may also have been reported by the tenants. When double reporting was detected during the editing process, the data on the questionnaires concerned were adjusted to eliminate duplication in the totals.

The 1959 data for fertilizer and lime are entirely comparable with those for 1954. A breakdown between dry and liquid fertilizing materials was not obtained in 1954 and data on cost of either fertilizer or lime were not obtained in 1959.

Fertilizer.—The report for fertilizer was to refer only to commercial fertilizer and fertilizing materials, including rock phosphate. The acres fertilized and the tons of fertilizer applied to those acres were obtained separately for selected crops. The selected crops varied by region so that it was possible to obtain detailed data for the crops most commonly fertilized in each region. In cases where the same land was used for more than one crop, the acres fertilized were to be reported separately for each crop. If the same crop was fertilized more than once, however, the acres in that crop were to be reported only once. In all cases, the total quantity of fer-

tilizer used in 1959 was to be reported, including quantities used on land occupied by crops planted in 1958 or by crops to be harvested in 1960.

Reports for quantity of fertilizer and fertilizing materials used were required for both dry and liquid materials. The terms "dry" and "liquid" referred to the form in which the fertilizers and fertilizing materials were purchased and not to the way in which they were applied. Thus, dry fertilizers were those purchased in dry or solid form, as powders, dusts, granules, pellets, etc.; liquid fertilizers were those purchased in liquid form, as solutions or as liquefied gases.

Lime.—The data for lime relate to the total acreage limed in 1959 and the total tonnage of lime and liming materials used on those acres for purposes of conditioning the soil. Instructions on the questionnaire stated that ground limestone, hydrated and burnt lime, marl, and oyster shells were to be included but that lime used for spraying or sanitation purposes was to be omitted.

For some counties, the tonnage of lime shown in the table may be less than the tonnage reported for the Agriculture Conservation Program or the Conservation Reserve Program of the Soil Bank. Differences may be due either to sampling error or to under-reporting by farm operators. Many of the differences are minimized or eliminated entirely in the data presented on a State or regional basis.

Specified Farm Expenditures.—The data for farm expenditures are estimates based on reports obtained from the sample farms. The 1959 questionnaire contained questions for six items of farm expenditure: (1) purchase of feed for livestock and poultry, (2) purchase of livestock and poultry, (3) machine hire, (4) hired labor, (5) seeds, bulbs, plants, and trees, and (6) gasoline and other petroleum fuel and oil. With the exception of items (2) and (5), exactly the same questions were asked in 1954. For each item specified, the total expenditures made for the farm in 1959 were to be reported, whether made by the farm operator, his landlord, or both. A farm operator who rented part of his land to others was to report only the expenditures for the land he operated himself. Enumerators were instructed to ask respondents who had difficulty estimating their expenses for the period between enumeration and the end of the year to estimate them on the basis of current costs.

Feed.—The report on feed purchased for livestock and poultry was to include expenditures for grain, hay, millfeeds, pasture, salt, condiments, concentrates, and mineral supplements as well as for the grinding and mixing of feed. The estimated cost of items furnished by a landlord, contractor, or other owner for feeding poultry and livestock kept on the farm was also to be included. Payments made by a tenant to his landlord for feed grown on the tenant farm were to be excluded.

Livestock and Poultry.—The cost of baby chicks and turkey poults was to be included in the expenditures made for the purchase of livestock and poultry. Enumerators were instructed to ask the farm operator to include the cost or estimated purchase value of poultry and livestock provided by others and cared for by the operator under a contract feeding arrangement. The cost of livestock purchased for resale within 30 days was not to be included. A short-term transaction of that nature was considered to be a dealer operation, not an agricultural one.

Data on the purchase of livestock and poultry were not obtained in 1954. The instructions for the 1959 census specified that expenditures for domestic rabbits, fur-bearing animals kept in captivity, and bees were to be included. Any lack of comparability in the 1950 and 1959 data resulting from inclusion or exclusion of rabbits, fur-bearing animals, or bees is considered to be so slight as to be insignificant.

Machine Hire.—Expenditures for machine hire relate to custom machine work, such as tractor hire, threshing, grain or seed combining, silo filling, baling, cotton picking, cotton ginning, corn picking, plowing, vegetable harvesting, fruit picking, spraying, and dusting. Any amount spent for the labor included in the cost of machine hire was to be considered as part of the total expenditure. The cost of freight or trucking and exchange work without pay were to be omitted.

Hired Labor.—Expenditures for hired labor were to include total cash payments made in 1959 to family members and to others for farm labor. Payments to persons supplied by a contractor or a cooperative organization and paid directly by them or by the crew boss were also to be included. Payments

for the following types of work were to be excluded: housework, contract construction work, custom machine work, and repair, installation, or construction work done by persons specifically employed for such work.

Gasoline and Other Petroleum Fuel and Oil.—Expenditures for gasoline and other petroleum fuel and oil were to relate only to the products used in the farm business. Enumerators were instructed to exclude the cost of petroleum products used for the family automobile when operated for other than farm business purposes and of products used in the farmhouse for heating, cooking, and lighting.

Seeds, Bulbs, Plants, and Trees.—Expenditures were to represent the total amount spent for seeds, bulbs, plants, and trees to be used on the farm operated. The value of seed grown on the farm was to be excluded. For nurseries and greenhouses, the cost of products purchased for immediate resale was also to be excluded.

This item of expenditure was not included in the 1954 Census. The data are comparable with those for 1950, however.

Crops

Crops Harvested.—The 1959 agriculture questionnaire was similar to the questionnaire used in several previous censuses in that it provided for the collection of detailed data for all crops harvested on each individual farm. The variation in the crops listed on the questionnaires used in different States made possible the separate reporting of all important crops grown in a given area. All versions of the questionnaire contained several "All other crops" questions where crops not specifically listed in separate questions were to be reported.

Acreage of Crops Harvested.—In most instances, the acreage reported for individual crops represents the area harvested during 1959. The area harvested is often less than the area planted. For fruit orchards and groves, vineyards, and planted nut trees, the acreage reported represents the total area in both bearing and nonbearing trees and vines as of the date of enumeration—usually a date in October, November, or December 1959. For soybeans, cowpeas, and peanuts, the acreage grown for all purposes was reported as well as the acreage harvested for specific purposes. For velvet beans, only the acreage grown was reported. As the enumeration was about to begin in South Florida (those counties in which the enumeration was begun on October 7), an instruction was issued to the effect that the data for vegetables and potato crops should relate to a full year, beginning on October 1, 1958, and ending September 30, 1959.

Quantity of Crops Harvested.—Except for citrus fruits, olives, avocados, and for vegetable and potato crops in South Florida (see preceding paragraph) data for quantity harvested relate to the calendar year 1959. For citrus fruits, the quantity harvested from the bloom of 1958 for the 1958-59 marketing season was to be reported. For olives, the crop harvested in 1959 was to be reported for all States except California and Arizona. Enumerators in those two States were instructed to report olives harvested from the bloom of 1958 during the 1958-59 harvest season (September 15, 1958, to February 28, 1959). In the case of avocados, the data for California were to relate to the quantity harvested from the bloom of 1958 for the marketing season that extended from October 1, 1958 to September 30, 1959; the data for Florida were to relate to the crop harvested for the marketing season that extended from July 1, 1959, to February 28, 1960. Respondents were to estimate quantities not yet harvested at the time of enumeration.

Unit of Measure.—The unit of measure in which quantities were to be reported has varied for some crops, not only from State to State, but also from census to census. The aim has been to permit reporting in the units of measure currently in use. In the State and county tables, the quantities harvested for each crop are usually expressed in the unit of measure given on the 1959 agriculture questionnaire. In 1959, for corn and Irish potatoes, a choice between two units in which to report the production was given in some States. (See the discussion for those crops.) To provide readily comparable information, data published in earlier reports in different units of measure generally have been converted to the units used in 1959.

Corn.—In the 1959 census, detailed questions regarding the purpose for which corn was harvested were asked in all States. For most States, bushels was the only unit specified for corn

for grain. In some areas, however, where farmers were not accustomed to using bushels as the unit of measure, the questionnaire contained a provision for the quantity of corn for grain to be reported either in bushels (shelled basis) or in baskets of ear corn. As in former censuses, some reports were received in units of measure other than bushels or baskets. Prior to tabulation, all reports were converted to bushels (shelled basis) on the basis of the following factors: 70 pounds of ear corn, 2 baskets of ears, or 56 pounds of shelled corn equal one bushel. A barrel of ear corn was usually considered equal to 5 bushels of shelled corn.

Annual Legumes.—For soybeans, cowpeas, and peanuts, the acres and quantity grown or harvested for specific purposes, as well as the total acreage grown for all purposes, were obtained for areas where these crops are grown extensively; for velvetbeans, only the total grown for all purposes was obtained. For all these crops except, possibly peanuts, the total acreage grown for all purposes includes some acreage that was plowed under for green manure. In a few Southern States, separate figures were obtained for the acres grown alone and the acres grown with other crops. In 1959, as in 1954, enumerators were instructed to report green soybeans and blackeyes and other green cowpeas harvested for sale as vegetables and not as annual legumes.

Hay Crops.—Data for the total acres of land from which hay was cut exclude the acreage in sorghum, soybean, cowpea, and peanut hays. These crops were reported in separate questions in the States where they are important. To obtain the total acres from which other hays were cut, the acres of the various hay crops, including grass silage, were added together for each county. The corresponding totals for 1954 were obtained by the same procedure. For the 1950 census, however, the totals were based on farmers' own reports of their total acreage in harvested hay crops.

The questionnaire contained an instruction that if two or more cuttings were made from the same land, the total production from all cuttings was to be reported but the acres cut were to be counted only once. In cases where both hay and grass silage were cut from the same land, the total acreage was to be reported for both crops. In 1959, as in 1954, alfalfa hay included alfalfa and alfalfa mixtures for hay and for dehydrating; clover and timothy hay included clover, timothy, and mixtures of clover and grasses; small grain hay included oats, wheat, barley, rye, or other small grains cut for hay. The hay crops listed on the questionnaire varied somewhat from one State or region to another. The kinds of hay to be included in separate questions can be determined for a specific State from reference to the facsimile of the questionnaire that is in the appendix.

The tonnage of hay, including alfalfa hay for dehydrating, is given on a dry-weight basis. Prior to tabulation, production reported in green weight was converted to its dry-weight equivalent by dividing by 3. However, the production of grass silage is given in terms of green weight.

Field Seed Crops.—The field seed crops listed on each version of the questionnaire were limited to those considered most important within the given State. Each version of the questionnaire contained space for listing other field seed crops in order to facilitate the reporting of all field seed crops harvested. Quantity harvested was to be reported in terms of clean seed for most field seed crops. Bluegrass, or Junegrass seed, was to be reported in terms of green seed for Iowa, Kansas, Kentucky, Minnesota, Missouri, Nebraska, South Dakota, North Dakota, and Tennessee. No mention was made of "green-weight basis" for other States where this crop was to be reported in the "All other" question.

Irish Potatoes and Sweetpotatoes.—For Irish potatoes and sweetpotatoes (including yams), the total quantity harvested was to be reported for each crop in all cases, whether harvested for

home use or for sale or whether used for livestock feed. The acreage harvested was to be reported for each crop only in cases where the quantity amounted to 20 or more bushels (or the approximate equivalent in terms of hundredweights, barrels, or pounds, as explained on different versions of the questionnaire). This method of reporting was designed to facilitate the enumeration of potatoes harvested on small plots for home use. Essentially the same procedure was followed in both 1954 and 1950. In earlier censuses, however, the acreage of Irish potatoes and sweetpotatoes was to be reported in all cases, even when production was solely for home use. Therefore, the data on acres for censuses prior to 1950 are not fully comparable with those for the last three censuses, especially in counties or States where production is largely for home use.

The unit of measure in which quantity was to be reported varied from one State or region to another to correspond with the units most commonly used in a given area. In 27 States, the questionnaire provided a choice for reporting either bushels or 100-pound bags (hundredweights). The published data for counties and States are in terms of bushels.

Berries and Other Small Fruits.—The question for berries and other small fruits related specifically to the acreages and quantities harvested for sale. Only tame or cultivated berries were to be reported except for the New England States, where wild blueberries were also to be included. Enumerators were instructed always to report the total quantity of each kind of berry harvested for sale but to report the area harvested only when it amounted to one-tenth acre or more. Nonbearing areas and areas and quantities harvested for home use were to be excluded. The data for 1959 and 1954 are fully comparable.

Tree Fruits, Nuts, and Grapes.—In 1959, as in 1954, fruit trees, nut trees, and grapevines were not enumerated for farms having a combined total of less than 20 at the time of enumeration. Both bearing and nonbearing trees and vines were to be included but not any that had been abandoned. For censuses prior to 1954, all fruit or nut trees and grapevines on the farm were to be enumerated, regardless of the number. Because of this change in enumeration procedure, the data for 1959 and 1954 are not fully comparable with those for earlier censuses. In commercial fruit-producing counties, the change in procedure may have had a considerable effect on the number of farms reporting without causing any significant changes in the number of trees and vines nor in the quantity harvested. In counties where most of the trees or vines are in small plantings and where production is largely for home-use, however, the change may have caused a significant reduction not only in the number of farms reporting but also in the number of trees and vines and in the quantity harvested.

In both 1959 and 1954, the area in fruit orchards, groves, vineyards, and planted nut trees was enumerated when there were 20 or more fruit trees, nut trees, and grapevines. In 1950, the corresponding area was enumerated only if it amounted to one-half acre or more. In censuses prior to 1950, the area was to be reported regardless of its size or of the number of trees and vines. Enumerators frequently omitted the fractional acreages in small plantings and home orchards, however. In some counties, small plantings or home orchards comprise a sizeable proportion of the total fruit and nut acreage. For those counties, the change from one census to another in acreage of land in fruits and nuts may not be due to fact but merely to differences in enumeration.

In 1959, California was the only State for which the acreage in each individual fruit and nut crop was obtained. In 1954, such acreage was also obtained for Arizona. In all States, the number of bearing and nonbearing trees or vines on the farm at the time of enumeration and the quantity harvested in 1959 were to be reported separately for each fruit and nut crop. (Exceptions in the harvest period for citrus fruits, avocados, and

olives are described on p. XIX.) The unit of measure in which quantities were to be reported varied from one State to another. Tables in this report show quantities in the unit of measure appearing on the 1959 questionnaire used in the State.

Nursery and Greenhouse Products.—The questions about nursery and greenhouse products related only to products grown on the place for sale. Crops bought for resale without additional cultivation were to be excluded. The area used for growing and the value of sales were to be reported separately for each of three groups, as follows:

- a. Nursery products, (trees, shrubs, vines, and ornamentals).
- b. Cut flowers, potted plants, florist greens, and bedding plants. For these items, the area grown in the open was to be reported separately from the area grown under glass.
- c. Vegetables grown under glass, flower seeds, vegetable seeds, vegetable plants, bulbs, and mushrooms. For these items, the area grown in the open was to be reported separately from the area grown under glass or in the house.

The data obtained for 1959 are comparable with those for 1954 and 1950 since the questions asked were essentially the same in the three censuses. Detailed data regarding the production and sale of nursery, greenhouse, and other horticultural products on farms having sales of \$2,000 will be published in volume V, part 1.

Forest Products.—The forest products data obtained in the Census of Agriculture relate only to the products cut on farms. Commercial logging, timber operations, and forest products grown or cut on nonfarm places are excluded. Therefore, the data in this report do not represent the total forestry output or income for a county or State.

The questions included on the 1959 agriculture questionnaire are more detailed than those asked in the 1954 Census. Value was obtained for the sale of standing timber or trees and for the sale of poles and piling, bark, bolts, and mine timbers. The quantity cut, whether for home use or sale, and the quantity sold were obtained for individual forestry products such as firewood and fuelwood, fence posts, sawlogs and veneer logs. Data relating to pulpwood, Christmas trees, maple trees, and maple syrup were obtained in States where such products are important commercially.

Value of Crops Harvested.—The total value of crops harvested represents the estimated value of all crops harvested during the crop year 1959. It includes the value of quantities consumed on farms as food, feed, seed, etc., as well as quantities sold. Farmers were not asked to report values of crops harvested; the values were calculated in the Processing Office. For individual crops, the quantity harvested was multiplied by the average price at which the crop was sold in the State. State average prices were furnished to the Bureau of the Census by the Agricultural Marketing Service of the U.S. Department of Agriculture. They are based on reports received from a sample of farmers and dealers. Quantities harvested were not obtained for vegetables nor for nursery and greenhouse products. Therefore, for those crops, the value of sales, as obtained in the enumeration, was used in the calculation of total value of crops harvested.

Value of Crops Sold.—The questionnaire required value of sales of crops to be reported only for total vegetables, nursery and greenhouse products, and certain forest products. For all other crops, the value of sales was calculated on a county level during processing operations by multiplying the State average prices by either the quantity sold or the quantity harvested. Reports of quantity sold were obtained during the enumeration only for some of the major field crops. Quantity harvested was used in the calculation of value of crops sold for such crops as cotton, tobacco, etc., that are customarily grown for sale. The procedures used for the various crops are described on page XXV. They

are similar to the procedures followed in 1954. In 1950, values of crops sold were obtained for each farm during the enumeration.

IRRIGATION

Definition of Irrigated Land.—Irrigated land is defined as land watered for agricultural purposes by artificial means. These means included subirrigation as well as systems whereby water was applied to the ground surface, either directly or by sprinklers. Land flooded for rice cultivation was considered as irrigated. Land flooded during high-water periods was to be included as irrigated only if water was directed to agricultural use by dams, canals, or other works. The definition of irrigated land specifically excluded land where the "water table", or natural level of underground water, was controlled by drainage works with no additional water brought in by canals or pipes.

Enumeration of Irrigated Land.—A question on total land irrigated was asked in all States, with the exception of Alaska. The acreage reported for this question includes not only irrigated cropland but also any other land that was irrigated in 1959.

The questionnaires used in the 17 Western States, Louisiana, and Hawaii included several additional questions regarding irrigation. These questions related to the acreage of land irrigated by sprinklers, irrigated land from which crops were harvested, specific crops irrigated, and source of irrigation water. Such additional data, for irrigated farms, are presented in county table 1a for these States.

Statistics on the irrigation enterprises which supplied irrigation water were collected in the 1959 Census of Irrigation and are published in Volume III, "Irrigation of Agricultural Lands". This report contains a considerable amount of data about irrigation for the 17 Western States and Louisiana.

Irrigated Farms.—All farms reporting any land irrigated in 1959 are counted as irrigated farms.

Land in Irrigated Farms.—Data for land in irrigated farms according to use relate to the entire acreage in these farms, including land that was not irrigated.

Land Irrigated.—Data for land irrigated relate only to that part of the land in irrigated farms that was watered by artificial means at any time in 1959. Separate figures are given for farms reporting land irrigated by sprinklers whether or not the land was also irrigated by other means. Additional figures are given for farms reporting land irrigated by sprinklers only. Data on sprinkler irrigation were not obtained in the 1954 census.

Irrigated Cropland Harvested.—The data for irrigated cropland harvested relate to all irrigated land from which crops were harvested in 1959, regardless of the method of irrigation. An instruction on the questionnaire reminded enumerators and respondents to include irrigated land from which hay was cut, irrigated land in both bearing and nonbearing fruit and nut crops, and irrigated land from which volunteer crops were harvested. Each irrigated acre was to be reported only once, regardless of how many crops were harvested from it.

Other Irrigated Land.—This classification was obtained by subtraction of the acreage of irrigated cropland harvested from the acreage of total land irrigated. It represents primarily irrigated cropland not harvested and irrigated pasture or grazing land.

Farms Irrigated By Number of Acres Irrigated.—All farms on which any land was irrigated in 1959 are classified according to the number of acres irrigated in county table 1a for the 17 Western States, Louisiana, and Hawaii. This classification is based on total land irrigated. Therefore, it includes not only the irrigated land from which crops were harvested but also all other irrigated land, regardless of use.

Land Irrigated By Source of Water.—The agriculture questionnaire contained a question as to what proportion of irrigated water used on the farm in 1959 was obtained from ground-water, surface-water, and irrigation-organization sources. Respondents were asked to report separately the percentage of

water obtained from each source. The number of acres that were irrigated by water from each source or combination of sources was calculated during office processing operations by applying the percentages to the total land irrigated.

Ground-water sources relate to wells (pumped or flowing) and springs; **surface-water sources** relate to streams, lakes, reservoirs, and sewage and drainage ditches. For each of these sources, only water obtained by pumps or other works operated as part of the operator's own farm or as part of another single farm was to be included. **Irrigation-organization sources** relate to irrigation enterprises organized to supply water to a group of farms, regardless of how or where the enterprise obtained the water. The irrigation enterprise may be a legal organization or a group of farmers informally organized to operate a supply ditch or other works to provide water for their own farms.

LAND-USE PRACTICES

Summary Information.—The 1959 data for land-use practices are estimates based on reports obtained from only a sample of farms. Comparable data are not presented for 1954 because questions about land-use practices were included on the 1954 questionnaire for only a limited number of States. The various land-use practices relate to methods for reducing soil erosion, either by improving the soil, controlling the run-off of water, or reducing the blowing of topsoil.

Cropland in Cover Crops.—The data relate to land on which cover crops were turned under for green manure in 1959 and which was then planted to another crop. The entire acreage of cover crops so used was to be reported even if the following crop failed.

Cropland Used for Grain or Row Crops Farmed on the Contour.—This item relates to land on which grain or row crops were planted in level rows around the slope of a hill.

Land in Strip-Cropping Systems for Soil-Erosion Control.—Strip-cropping was defined as the practice of alternating close-sown crops with strips or bands of row crops or of alternating either close-sown or row crops with bands of cultivated fallow land. The published data refer to the total acreage of all fields and tracts in which strip-cropping was practiced in 1959.

System of Terraces on Crop and Pasture Land.—This item relates to the acreage in ridge-type or channel-type terraces constructed on sloping cropland and pastureland.

LIVESTOCK AND POULTRY

Inventories.—Data for livestock and poultry on farms relate to the number on hand at the time of enumeration. All livestock and poultry, including those being kept or fed under contract, were to be enumerated on the farm or ranch where they were, regardless of who owned them. Livestock in transit from one grazing area to another or grazing in national forests, grazing districts, open range, or on land used under permit were to be reported as being on the place where the person who had control over them had his headquarters.

The time of year at which livestock and poultry are enumerated affects the data. Therefore, the date of enumeration needs to be considered when totals for the various censuses are compared. Both the 1959 and the 1954 census data represent fall inventories. These censuses came at a time of large-scale movement of flocks and herds from one range to another, from ranch to feed lot, and from farm or ranch to market.

The censuses of 1920, 1925, 1935, and 1945 were taken as of January 1 and those of 1930, 1940, and 1950, as of April 1. A count made in April varies considerably from one made in January. In most areas a large number of animals are born between January and April. A considerable number of older animals die or are sold during the same period. In the range States, along

with the change in season and grazing condition, sheep and cattle are moved from one locality or county to another. This movement may affect the comparability of data for counties and, in some cases, for States. The comparability of data by age has been affected also by changes in the questions from one census to another.

Milk Cows, Cows Milked, Milk Produced, and Butter.—Data on the number of milk cows, cows milked, and milk produced relate to the day preceding the enumeration. Data for butter churned were obtained only for 14 States and relate to the calendar week preceding the enumeration. The data for cows milked yesterday and milk produced yesterday are not given in this volume. These figures were obtained primarily to serve the needs of the U.S. Department of Agriculture in making monthly and annual estimates of milk production. These figures can be made available, at a small cost, to others who express an interest in them.

Whole Milk and Cream Sold.—Data for whole milk and cream sold relate to the entire year 1959 and are estimates based on reports obtained for farms in the sample. All milk and cream sold from the farm (except quantities purchased from some other place and then resold) were to be included, regardless of who shared the receipts. The questionnaire provided three alternative units of measure for reporting the quantity of milk sold—pounds of milk, gallons of milk, and pounds of butterfat. The respondent was thus permitted to report quantity according to the unit of measure in which payment was received. In the State and county tables, the data for milk are given in the unit of measure most commonly used in the State. Pounds of butterfat were converted into gallons or pounds of whole milk on the basis of the average butterfat content of milk as shown by data furnished by the Agricultural Marketing Service of the U.S. Department of Agriculture.

Sows and Gilts Farrowing.—In the 1959 census, data were obtained for the number of litters farrowed between December 1, 1958, and June 1, 1959, and from June 1 to December 1, 1959. In the 1954 census, data were obtained for the sows and gilts that farrowed rather than for the number of litters.

Sheep, Lambs, and Wool.—In the 1959 census, questions about sheep, lambs, and wool were asked in all States. Data on shearings and on amount of wool shorn were obtained for lambs and sheep separately. In the 1954 census, sheep and lamb inventories were not obtained for Florida, Georgia, and South Carolina.

Goats and Mohair.—In 1959, questions on goats, kids, and mohair appeared on the questionnaires for the following nine States: Arizona, California, Missouri, Nevada, New Mexico, Oklahoma, Oregon, Texas, and Utah. In 1954, corresponding data were obtained for Louisiana, New Mexico, Oklahoma, Oregon, Texas, Washington, and selected counties in Missouri.

Bees and Honey.—No questions on bees and honey were included on the questionnaires for either the 1959 or the 1954 census. In 1959, however, enumerators were instructed to obtain agriculture questionnaires for places not having agricultural operations if they were engaged in beekeeping. The number of hives of bees and the amount of honey sold were to be reported in the "Remarks" space of the questionnaire. Data for bees and honey are not included in this report.

Value of Livestock on Farms.—To obtain the value of livestock on farms, the number of each class of livestock or poultry on hand was multiplied by the State average price for 1959, as furnished by the Agricultural Marketing Service of the U.S. Department of Agriculture. Comparable data for 1954 were compiled by the same method on the basis of average prices for that year.

Sales of Live Animals.—Data for the number and value of animals sold alive in 1959 are estimates based on reports for sample farms only. Corresponding data for 1954 were obtained for all farms. The dollar value of sales was obtained from the farmer

for cattle, calves, and horses and mules. Average value per head for other livestock sold was obtained from the U.S. Department of Agriculture. In the 1959 census, respondents were asked to report separately the number of live animals already sold and the number estimated to be sold between the time of enumeration and the end of the year. This separation of reports for the number sold and to be sold was designed to assure more complete coverage of all livestock sales made during the year. In the 1954 census, only totals for the entire year were obtained though reference was made to animals to be sold between enumeration and the end of the year.

Sales of Poultry and Poultry Products.—For both the 1959 and the 1954 Censuses, sales of chickens were obtained for two groups: (1) broilers and (2) other chickens. The enumeration of broiler sales presents problems arising from the varied contractual arrangements under which broilers are produced. The questionnaire contained an instruction to the effect that all broilers grown for others under contract were to be reported as sold. During office processing operations, the data reported for inventories and sales of chickens four months old and over, chicken eggs sold, and broilers sold were carefully examined. Obvious inconsistencies indicating confusion between broilers and other chickens were corrected on the basis of estimated values and, for sample farms, on the basis of data reported for expenditures for feed, poultry and livestock purchases, hired labor, etc.

Questions relating to poultry other than chickens (and broilers) were generally the same in 1959 as in 1954. In the 1959 census, however, only total numbers were obtained for turkeys and turkey fryers raised and for turkey hens kept for breeding whereas the 1954 questionnaire asked for a breakdown between light and heavy breeds. Also, for poultry other than chickens and turkeys, the 1959 census obtained the number sold whereas the 1954 census obtained the number raised.

CLASSIFICATION OF FARMS

Scope of Classification.—Data for land in farms, and for crop-land harvested in farms classified by size, by color of operator and by tenure of operator were tabulated for all farms. However, most of the detailed data by size of farm, by color of operator, by tenure of operator, by economic class, and by type of farm are estimates based on farms in the sample. The farm classifications by size of farm, color of operator, tenure of operator, economic class of farm, and type of farm were made in the processing office on the basis of data reported on each questionnaire.

Farms by Size.—Farms were classified by size according to the total land area established for each farm. The same classification was used for all States. According to definition, a farm is essentially an operating unit, not an ownership tract. All land operated by one person or partnership represents one farm. In the case of a landlord who has assigned land to croppers or other tenants, the land assigned to each cropper or tenant is considered a separate farm even though the landlord may operate the entire landholding as one unit in respect to supervision, equipment, rotation practice, purchase of supplies, or sale of products. In some parts of the South, a special Landlord-Tenant Questionnaire was used to assure an accurate enumeration of each unit within a multiple-unit operation. A change was made in the size classification for 1959, as contrasted with several preceding years, by subdividing the 1,000-acre-and-over group and by combining two previously recognized groups, viz., 10 to 29 acres and 30 to 49 acres.

Farms by Color of Operator.—Farms were classified by color of operator into two groups, "white" and "nonwhite." "Nonwhite" includes primarily Negro and Indian operators but also some of other racial origin.

Enumerators were instructed to report the race on the basis of their own observation whenever possible rather than by asking the respondent.

Farms by Tenure of Operator.—The classification of farms by tenure of operator was based on data reported for land owned, land rented from others or worked for others on shares, land managed for others, and land rented to others or worked on shares by others. The same basis of classification was used in 1959 as in 1954.

For 1959, each questionnaire was coded, during the editing process, to indicate whether it represented a farm operated by a full owner, part owner, manager, or tenant. The sample questionnaires for tenants were given a code to indicate the kind of tenant.

The various classifications of tenure, as used for the 1959 census, are defined below:

- a. **Full Owners** operate only land they own.
- b. **Part Owners** operate land they own and also land rented from others.
- c. **Managers** operate land for others and are paid a wage or salary for their services. Persons acting merely as caretakers or hired as laborers are not classified as managers. If a farm operator managed land for others and also operated land on his own account, the land operated on his own account was considered as one farm and the land managed for others as a second farm. If, however, he managed land for two or more employers, all the managed land was considered to be one farm.
- d. **Tenants** rent from others or work on shares for others all the land they operate. They are further classified, as described below, on the basis of rental arrangements in regard to the payment of cash rent, sharing of crops, sharing of livestock or livestock products, and the furnishing of work power by the landlord.
 - (1) **Cash Tenants** pay cash rent, either on a per-acre basis or for the farm as a whole.
 - (2) **Share-Cash Tenants** pay part of the rent in cash and part in a share of the crops and/or of the livestock and livestock products.
 - (3) **Crop-Share Tenants** pay a share of the crops but not of the livestock or livestock products.
 - (4) **Livestock-Share Tenants** pay a share of the livestock or livestock products. They may or may not also pay a share of the crops.
 - (5) **Croppers** are tenants whose landlords furnished all the work animals or tractor power. They usually work under the close supervision of the landowners or their agents, or other farm operators. Also, the land assigned to them is often merely a part of a multi-unit operation. Croppers may or may not also pay cash rent or a share of crops, livestock, or livestock products. Data for croppers are available for only 16 southern States and Missouri.
- (6) **Other Tenants** are those who did not qualify for inclusion in any of the foregoing subclassifications. They may have had the use of land rent-free or in return for a fixed quantity of products, payment of taxes, maintenance of buildings, etc.
- (7) **Unspecified Tenants** are those for whom the rental arrangement was not reported.

The definition of each subclass of tenant was essentially the same for earlier censuses as for 1959. In 1945, however, the enumerator was asked to determine the subclass of tenants whereas in other censuses all classifications were made during the processing of questionnaires on the basis of the data reported. The procedure used in 1945 may have affected the comparability of the data, especially for cash tenants and share-cash tenants.

Farms by Economic Class.—The totals for farms by economic class are estimates for all farms made on the basis of data reported only for the sample farms. The economic classifications represent groupings of farms that are similar in characteristics and size of operation. The economic classes were established on the basis of one or more of four factors: (1) total value of all farm products sold, (2) number of days the farm operator worked off the farm, (3) the age of the farm operator, and (4) the relationship of income received by the operator and members of his household from nonfarm sources to the value of all farm products sold. Institutional farms, Indian reservations, agricultural experiment stations, and grazing associations were always classified as "abnormal."

The total value of farm products sold was obtained by addition of the reported or estimated values for all products sold from the farm. The value of cattle and calves, horses and mules, dairy products, some poultry products, vegetables, nursery and greenhouse products, standing timber, and miscellaneous forest products was obtained from the farm operator during the enumeration. The quantity sold was obtained during enumeration for corn, sorghums, small grains, hay, small fruits, some of the forest products, chickens and chicken eggs, hogs, sheep, and goats. To obtain the value of sales of these products, the quantity sold was multiplied by State average prices.

For each of the other products, the entire production was multiplied by the State average price. If the resulting value amounted to \$100 or more, the entire quantity produced was considered as sold. This procedure was followed only in establishing the economic class and the type of farm but was not used in establishing the total value of products sold from the farm. (See p. XXV.)

Farms were grouped into two major categories, commercial farms and other farms, mainly on the basis of total value of products sold. The 1959 class intervals and some of the criteria for determination of a given class are different from those used in 1954 and in 1950. In general, for 1959, all farms with a value of sales amounting to \$2,500 or more were classified as commercial. Farms with a value of sales of \$50 to \$2,499 were classified as commercial if the farm operator was under 65 years of age and (1) he did not work off the farm 100 or more days during the year and (2) the income received by the operator and members of his family from nonfarm sources was less than the value of all farm products sold. The remaining farms with a value of sales of \$50 to \$2,499 and institutional farms and Indian reservations were included in one of the groups of "other farms."

Commercial farms were divided into six economic classes on the basis of the total value of all farm products sold, as follows:

Class of Farm	Value of Farm Products sold
I-----	\$40,000 and over
II-----	\$20,000 to \$39,999
III-----	\$10,000 to \$19,999
IV-----	\$5,000 to \$9,999
V-----	\$2,500 to \$4,999
VI-----	\$50 to \$2,499

*Provided the farm operator was under 65 years of age, and—

(1) he did not work off the farm 100 or more days, and (2) the income that he and members of his household received from nonfarm sources was less than the total value of farm products sold.

Other farms were divided into three economic classes as follows:

a. **Class VII, Part-time.**—Farms with a value of sales of farm products of \$50 to \$2,499 were classified as "part-time" if the operator was under 65 years of age and he either worked off the farm 100 or more days or the income he and members of his household received from nonfarm sources was greater than the total value of farm products sold.

b. **Class VIII, Part-retirement.**—Farms with a value of sales of farm products of \$50 to \$2,499 were classified as "part-retirement" if the farm operator was 65 years old or over. Many of these are farms on which the income from nonfarm sources was greater than the value of sales of agricultural products. Others are residential, subsistence, or marginal farms. In previous censuses, the age of the farm operator was not a criterion for grouping farms by economic class. Since the number of elderly people in our population has been steadily increasing during recent years, a separate classification for farms operated on a part-retirement basis was considered important for an adequate analysis of the agricultural structure of a county or State.

c. **Class IX, Abnormal.**—All institutional farms and Indian reservations were classified as "abnormal," regardless of the value of sales. Institutional farms include those operated

by hospitals, penitentiaries, schools, grazing associations, government agencies, etc.

Farms by Type.—The data for farms by type are estimates based on data tabulated for the farms in the sample. The type represents a description of the major source of income from farm sales. To be classified as a particular type, a farm had to have sales of a particular product or group of products amounting in value to 50 percent or more of the total value of all farm products sold during the year.

The types of farms, together with the products on which type classification is based, are as follows:

Type of Farm	Source of Cash Income
	(Products with sales value representing 50% or more of total value of all farm products sold)
Cash-grain -----	Corn, sorghums, small grains, soybeans for beans, cowpeas for peas, dry field and seed beans and peas.
Tobacco -----	Tobacco.
Cotton -----	Cotton.
Other field-crop-----	Peanuts, potatoes (Irish and sweet), sugarcane for sugar or sirup, sweet sorghums for sirup, broomcorn, popcorn, sugar beets, mint, hops, and sugar beet seed.
Vegetable -----	Vegetables.
Fruit-and-nut -----	Berries, other small fruits, tree fruits, grapes, and nuts.
Poultry -----	Chickens, chicken eggs, turkeys, and other poultry products.
Dairy -----	Milk and cream. The criterion of 50 percent of total sales was modified in the case of dairy farms. A farm having value of sales of dairy products amounting to less than 50 percent of the total value of farm products sold was classified as a dairy farm, if— (a) Milk and cream sold accounted for more than 30 percent of the total value of products sold and— (b) Milk cows represented 50 percent or more of total cows and— (c) The value of milk and cream sold plus the value of cattle and calves sold amounted to 50 percent or more of the total value of all farm products sold.
Livestock other than dairy and poultry-----	Cattle, calves, hogs, sheep, goats, wool and mohair except for farms in the 17 Western States, Louisiana, and Florida that qualified as livestock ranches.
Livestock Ranches-----	Farms in the 17 Western States, Louisiana, and Florida were classified as livestock ranches if the sales of livestock, wool, and mohair represented 50 percent or more of the total value of farm products sold and if pastureland or grazing land amounted to 100 or more acres and was 10 or more times the acreage of cropland harvested.
General-----	Field seed crops, hay, silage. A farm was classified as general also if it had cash income from three or more sources and did not meet the criteria for any other type.
Miscellaneous-----	Nursery and greenhouse products, forest products, mules, horses, colts and ponies. Also all institutional farms and Indian reservations.

The type classifications were essentially the same for the 1959 as for the 1954 census except that tobacco farms and livestock ranches were not separately classified in 1954. Tobacco was included as one of the crops used in the classification of "other field crop" farms in 1954. The farms classified as livestock ranches in 1959 would have been classified as "livestock other than dairy and poultry" in 1954 without regard to the acreage in pasture.

Value of Farm Products Sold.—Data for the value of farm products sold in 1959 were obtained by enumeration for some products and by estimation for others. The questionnaire used for the 1959 census provided for farm operators to report value of sales for the following products:

Vegetables	Miscellaneous poultry products
Nursery and greenhouse products	Milk and cream
Standing timber	Cattle
Miscellaneous forest products	Calves
	Horses, mules, colts, and ponies

For all other agricultural products, the value of sales was estimated during the office processing. The State average prices used for calculating the value of farm products sold were furnished to the Bureau by the Agricultural Marketing Service of the U.S. Department of Agriculture. One of three following procedures was used.

(1) For the products for which data on quantities sold were obtained during enumeration, the State average prices were multiplied by the county totals of the quantities reported as sold or the quantities reported as produced for sale. The following products were covered by this procedure:

Corn for grain	Fence posts
Sorghums for grain, seed, sirup, or dry forage	Sawlogs and veneer logs
All small grains	Christmas trees
Hay crops	Chickens (broilers and others)
All berries and small fruits ¹	Chicken eggs
Firewood and fuelwood	Hogs and pigs
Pulpwood	Sheep and lambs
	Goats and kids

¹ Adjustment made for cranberries based on Cranberry Payment Program.

(2) For most of the agricultural products which are customarily raised for sale, the entire quantity produced was considered to be sold. The State average prices were, accordingly, multiplied by the county total of production. The following crops were covered by this procedure:

Cotton	Sugarcane for sugar
Popcorn	Tobacco
Sugar beets for sugar	Wool
Broomcorn	Mohair

(3) For all other crops, the State average prices were multiplied by the quantities sold as estimated on the basis of crop-disposition data furnished by the Agricultural Marketing Service, data reported in questions for "other crops" on the 1959 questionnaire, or data obtained from earlier censuses.

For all tree fruits, nuts, and grapes, the entire quantity produced was considered as sold, except for apples, apricots, sour and sweet cherries, peaches, plums, prunes, avocados, tangerines, oranges, and grapefruit in States where a portion of the crop was not harvested or was subjected to excess cullage as indicated by data obtained from the Agricultural Marketing Service of the U.S. Department of Agriculture.

The data for 1959 are comparable with those for 1954 since essentially the same procedures were used in both censuses for estimating quantities and values of farm products sold. In 1959, as in 1954, data for the sales of farm products represent total sales for the entire farm, regardless of who shared the receipts. For tenant-operated farms, the landlord's share of agricultural products was considered as sold provided the products were moved off the tenant farm. All crops, livestock, and poultry raised under a contract arrangement were considered as sold from the farm where they were raised. For institutional farms, all agricultural items produced on land operated by the institution and consumed by the inmates were to be reported as sold.

All sales data relate to one year's farm operations. Crop sales are for crops harvested during the crop year, whether the crops were actually sold immediately after harvest or placed in storage for later sale. Sales of livestock and livestock products relate to the calendar year, regardless of when the livestock or products were raised or produced. All wool and mohair reported as shorn or clipped was considered as sold.

Enumerators were instructed to record gross values of quantities sold, with no deductions for feed, seed, fertilizer, water, labor, or marketing costs. For some products, however, net values may have been reported. In the case of milk, particularly, some farm operators may have reported the payments they received as the gross value of sales, even though the buyer had deducted handling and hauling charges before making payment. Adjustments were made in the data reported only in cases of obvious error.

Chapter A

STATISTICS FOR THE STATE

(1)

State Table 1.—FARMS, ACREAGE, AND VALUE: CENSUSES OF 1920 TO 1959

Data: a value of land and buildings for 1959, 1954, and 1950 are based on reports for only a sample of farms. See text.

Item (For definitions and explanations, see text)	Unit	Dec. 31 of —							
		1920 (Oct. 1-Nov. 1)	1929 (Oct. 1-Nov. 1)	1939 April 1	1949 January 1	1954 April 1 ^b	1959 January 1 ^b	1959 April 1 ^b	1959 January 1 ^b
Farms	number	79,472	104,203	139,366	147,745	137,558	165,576	157,931	172,767

NA Not available.

¹For the Censuses of 1959 and 1964, in the Census year; for all other Censuses, in the calendar year preceding the Census.²Total acreage of crops for which figures are available, except that corn put for forage was excluded as much of this acreage was probably duplicated in the acreage of corn harvested for grain.³Not fully comparable for the various Census years because of differences in definition of cropland used only for pasture. See text.

State Table 2.—FARMS AND FARM ACRES ACCORDING TO USE, BY SIZE OF FARM: CENSUSES OF 1920 TO 1959

NA Not available. ¹For the Censuses of 1959 and 1954, in the Census year; for all other Censuses, in the calendar year preceding the Census. ²Total acreage of crops for which figures are available, except that corn cut for forage was excluded as root of this acreage was probably duplicated in the acreage of corn harvested for grain. ³50 to 99 acres. ⁴100 to 299 acres. ⁵Not fully comparable for the various Census years because of differences in definition of cropland used only for pasture.

State Table 3.—FARMS AND FARM ACREAGE, BY COLOR AND TENURE OF OPERATOR: CENSUSES OF 1920 TO 1959

[Data for 1959 and 1954 are based on reports for only a sample of farms. See text.]

NA. Not available. ¹For Censuses of 1959 and 1954, expenditures during Census year; for earlier Censuses, expenditures during the preceding calendar year. ²Cash payments for farm labor; housework not included. For 1919, 1924, 1935, 1942, and 1947, the data do not include expenditures for contract construction work, machine hire, and labor included in cost of machine hire. For 1920, the value of board furnished was included. ³Census of 1959, week preceding the enumeration; Census of 1954, week of October 24-30. Census of 1950, week preceding enumeration; Censuses of 1945 and 1935, first week of January; Census of 1940, last week of March. ⁴See text for differences in definition of farm workers. ⁵Separate data not available by day or week. ⁶Separate data not available for workers hired by the hour or piece-work basis. Questionnaire called for other hired labor including piecework and contract labor.

State Table 6.—LIVESTOCK AND POULTRY ON FARMS, NUMBER AND VALUE: CENSUSES OF 1920 TO 1959

NA Not available. ¹Does not include data for sheep and lambs sold alive. ²All dairy products sold. ³Published values for 1945 and 1940 were computed on the basis of average prices. For this table, these values have been adjusted to equal the enumerated value of all dairy products sold. ⁴Butter sold.

NA Not available.

¹Data excluded for farms unclassified as to type.²Trees, plants, vines, etc., in nurseries; flower and vegetable seeds, and bulbs.³Flowers and flowering plants grown for sale.⁴Crops grown under glass (flowers, plants, and vegetables) and propagated mushrooms.⁵Flowers, plants, and vegetables grown under glass; and flowers grown in the open.⁶Total square feet under glass.⁷Flower and vegetable seeds, bulbs, and flowers and plants grown in the open.⁸Value of vegetables and vegetable plants.⁹Not strictly comparable with other years as figures probably include some reports of firewood used on farms.¹⁰Figures include sales of standing timber.

State Table 10.—CHARACTERISTICS OF PLACES NOT COUNTED AS FARMS BECAUSE OF CHANGE IN DEFINITION OF FARM: 1959

Item (For definitions and explanations, see text)		Total	Item (For definitions and explanations, see text)		Total
Places excluded as farms by change in definition: 1954-1959					
Cropland harvested	number	8,567	Operators by days of work off place in 1959		
Under 10 acres	acres in place	206,593	No days	operators reporting	2,783
10 or more acres	places reporting	4,752	1 to 49 days	operators reporting	308
	acres	27,561	50 to 99 days	operators reporting	309
	places reporting	4,675	100 to 199 days	operators reporting	558
	places reporting	107	200 or more days	operators reporting	4,539
Operators by tenure			Operators not reporting	number	70
Full owners	number	6,386	Operators receiving other income of family exceeding value of farm products sold	operators reporting	7,355
Part owners and managers	number	699	Cattle and calves of all ages	places reporting	4,687
Tenants	number	1,482	Cows, including heifers that have calved	number	7,473
Operators by color				places reporting	4,072
White	number	5,040		number	4,431
Nonwhite	number	3,520	Hogs and pigs	places reporting	5,263
Operators by year began operation of present place				number	15,538
1959	operators reporting	353	Chickens 4 months old and over	places reporting	6,106
1958	operators reporting	366		number	145,200
1957	operators reporting	408	Corn harvested for all purposes	places reporting	3,690
1956	operators reporting	456		acres	10,848
1955-1955	operators reporting	1,658	Hay harvested	places reporting	490
1950 or earlier	operators reporting	5,132		acres	1,376
Operators by age					
Under 35 years	operators reporting	4,925			
35 to 64 years	operators reporting	1,543			
65 or more years	operators reporting	2,010			
Operator not reporting age	operator	34

FARMS BY TYPE OF FARM						
Cash-grain farms	number...	number...	number...	number...	number...	number...
Tobacco farms	223	278	400
Cotton farms
Other field-crop farms
Vegetable farms
Fruit-and-nut farms
Poultry farms
Livestock farms other than poultry and dairy farms
General farms
Miscellaneous and unclassified farms
SPECIFIED EQUIPMENT AND FACILITIES AND KIND OF ROAD						
Corn combines	number...	number...	number...	number...	number...	number...
Corn pickers
Pick-up balers
Field forage harvesters
Motortrucks
Tractors
Tractors other than garden
1 tractor
2 tractors
3 tractors
4 tractors
5 or more tractors
Wheel tractors
Crawler tractors
Garden tractors
Automobiles
Automobiles and/or motortrucks
Telephone
Home freezer
Milking machine
Electric milk cooler
Crop drier (for grain, forage, or other crops)
Power-operated elevator, conveyor, or blower
Farms by kind of road on which located						
Hard surface
Gravel, shell, or shale
Dirt or unpaved
Less than 1 mile to a hard surface road
1 or more miles to a hard surface road
1 mile
2 or 3 miles
4 miles
5 or more miles
FARM LABOR, WEEK PRECEDING ENUMERATION						
Hired workers
Regular hired workers (employed 150 or more days)
Farms reporting by number of regular hired workers
1 hired worker
2 hired workers
3 or 4 hired workers
5 to 9 hired workers
10 or more hired workers
RESIDENCE OF FARM OPERATOR						
Residing on farm operated
Not residing on farm operated
Operators not reporting residence

See footnotes at end of table.

Vegetables harvested for sale.....farms reporting...	4,124	1,406	3	40	61	121	440	595
Sales.....dollars...	7,413,444	491,564	14,711	13,288	91,150	75,390	241,020	115,925
Land in bearing and nonbearing fruit orchards, groves, vineyards, and planted nut trees ²farms reporting...	2,474	373	4	34	38	41	120	116
acres...	64,713	4,342	143	143	548	313	661	389

² Reported in small fractions.³ Includes milk equivalent of cream and butterfat sold.⁴ Does not include acreage for farms with less than 50 bushels harvested.⁵ Does not include data for farms with less than 20 trees and grapevines.

STATISTICS FOR THE STATE

State Table 18.—FARMS AND FARM CHARACTERISTICS OF COMMERCIAL FARMS BY TYPE OF FARM BY ECONOMIC CLASS OF FARM: CENSUS OF 1959

Part 4 of 8.—Fruit-and-nut farms

[Data are based on reports for only a sample of farms. See text.]

Item (For definitions and explanations, see text)	Total all commercial farms	Economic class						
		Total	Class I	Class II	Class III	Class IV	Class V	Class VI
FARMS, ACREAGE, AND VALUE								
Farms.....number.....	42,333	956	83	138	203	250	205	77
Percent distribution.....percent.....	xxx	100.0	8.7	14.4	21.2	26.2	21.4	8.1
Land in farms.....acres.....	6,669,427	223,462	58,602	58,101	49,680	27,860	20,750	8,459
Percent distribution.....percent.....	xxx	100.0	26.2	26.0	22.2	12.5	9.3	3.8
Average size of farm.....acres.....	157.5	223.7	706.0	421.0	244.8	111.4	101.2	109.9
Value of land and buildings								
Average per farm.....dollars.....	19,089	36,325	147,305	74,288	29,073	14,353	15,676	16,545
Average per acre.....dollars.....	137.10	182.27	221.62	198.21	132.19	189.35	172.13	142.95
Land in farms according to use								
Cropland harvested.....farms reporting.....	41,042	956	83	138	203	250	205	77
.....acres.....	2,245,568	85,163	28,420	22,507	15,652	11,415	6,085	1,084
1 to 9 acres.....farms reporting.....	4,071	50	15	35
10 to 19 acres.....farms reporting.....	9,764	117	5	30	60	22
20 to 29 acres.....farms reporting.....	8,300	115	25	50	35	5
30 to 49 acres.....farms reporting.....	8,161	241	60	75	15	15
50 to 99 acres.....farms reporting.....	5,871	190	5	15	70	85	15	...
100 to 199 acres.....farms reporting.....	2,804	125	32	10	5	...
200 to 499 acres.....farms reporting.....	1,701	100	50	10
500 to 999 acres.....farms reporting.....	310	18	1
1,000 or more acres.....farms reporting.....	60
Cropland used only for pasture.....farms reporting.....	13,773	241	21	55	55	70	35	5
.....acres.....	453,742	6,943	1,730	1,468	1,380	1,250	515	100
Cropland not harvested and not pastured.....farms reporting.....	14,794	516	39	73	107	150	100	47
.....acres.....	389,234	22,016	3,779	5,411	5,410	2,930	2,300	2,186
Soil-improvement grasses and legumes.....farms reporting.....	103,468	183	19	44	46	52	30	11
.....acres.....	103,468	8,448	1,816	2,451	1,935	625	520	1,121
Other cropland (idle and crop failure).....farms reporting.....	13,005	432	33	56	96	125	80	42
.....acres.....	284,566	13,568	1,463	2,960	4,495	2,105	1,780	1,065
Woodland pastured.....farms reporting.....	9,553	287	27	46	71	65	55	21
.....acres.....	679,963	2,296	1,341	1,260	1,720	2,560	480	330
Woodland not pastured.....farms reporting.....	23,567	750	78	123	153	200	135	67
.....acres.....	2,406,494	7,700	17,340	19,760	17,230	7,960	3,920	2,191
Other pasture (not cropland and not woodland).....farms reporting.....	7,333	455	30	53	111	95	105	21
.....acres.....	314,334	14,638	3,702	3,218	3,705	1,030	2,425	535
Improved pasture.....farms reporting.....	3,159	228	31	51	36	30	45	15
.....acres.....	144,020	7,364	2,401	1,668	2,215	365	590	145
Irrigated land in farms.....farms reporting.....	1,406	204	64	53	27	30	25	5
.....acres.....	25,303	9,791	4,305	3,391	405	535	605	50
Land use practices								
Cropland in cover crops.....farms reporting.....	3,226	105	23	32	15	30
.....acres.....	116,273	5,940	3,915	1,415	235	400	...	25
Cropland used for grain or row crop, farmed on the contour.....farms reporting.....	3,728	269	31	58	43	70	65	5
.....acres.....	232,306	18,537	5,144	8,412	1,575	1,980	1,350	30
Land in strip-cropping systems for soil-erosion control.....farms reporting.....	428	27	5	12	5	...	5	...
.....acres.....	2,227	3,303	75	1,453	1,750	...	25	...
Systems of terraces on crop and pasture land.....farms reporting.....	7,742	127	53	53	103	160	135	35
.....acres.....	59,729	58,113	16,958	17,115	10,950	7,415	4,790	885
FARM OPERATORS BY AGE								
Operators reporting age.....number.....	41,841	943	81	137	198	245	205	77
Under 25 years.....number.....	863	5
25 to 34 years.....number.....	4,404	71	10	5	16	20	15	5
35 to 44 years.....number.....	10,574	227	26	36	55	65	35	10
45 to 54 years.....number.....	15,146	279	16	29	45	95	60	22
55 to 64 years.....number.....	10,313	215	22	31	37	40	45	40
65 or more years.....number.....	2,537	146	7	24	45	25	45	45
Average age.....years.....	48.0	51.0	49.8	51.8	51.3	48.5	53.2	51.9
OFF-FARM WORK AND OTHER INCOME								
Farm operators—								
Working off their farms, total.....operators reporting.....	13,608	447	21	46	100	155	105	20
1 to 99 days.....operators reporting.....	8,315	6	15	20	20	15	...	20
100 to 199 days.....operators reporting.....	2,410	91	15	15
200 or more days.....operators reporting.....	2,883	30	31	70	120	75
With other members of family working off farm.....operators reporting.....	4,361	166	6	20	35	65	30	10
With income from sources other than farm operated and off-farm work.....operators reporting.....	3,706	201	10	21	55	70	40	5
With other income of family exceeding value of agricultural products sold.....operators reporting.....	3,561	309	13	16	65	135	80	...
Operators not working off their farms or not reporting as to work off their farms.....operators reporting.....	28,725	549	62	92	103	95	100	57
With other members of family working off farm.....operators reporting.....	5,020	109	5	27	46	20	40	11
With income from sources other than farm operated.....operators reporting.....	4,326	210	20	48	52	30	45	15
With other income of family exceeding value of agricultural products sold.....operators reporting.....	1,311	9	...	11	21	25	35	...
FARMS BY SIZE								
Under 10 acres.....number.....	2,176	10	5	5
10 to 49 acres.....number.....	18,147	25	45	65	20
50 to 99 acres.....number.....	4,340	85	15	45	20	5
100 to 199 acres.....number.....	3,653	160	5	5	35	45	45	25
200 to 499 acres.....number.....	3,553	135	5	15	15	45	35	15
500 to 999 acres.....number.....	2,225	65	...	5	15	30	15	...
1,000 to 199 acres.....number.....	1,492	35	5	15	15
200 to 299 acres.....number.....	1,137	10	...	10	25	30
300 to 499 acres.....number.....	1,107	31	...	45	35	10	10	6
500 to 999 acres.....number.....	1,694	83	...	35	20	...	5	...
1,000 to 1,999 acres.....number.....	677	24	12	8	3
2,000 or more acres.....number.....	292	5	5

See footnotes at end of table.

State Table 18.—FARMS AND FARM CHARACTERISTICS OF COMMERCIAL FARMS BY TYPE OF FARM BY
ECONOMIC CLASS OF FARM: CENSUS OF 1959—Continued

Part 4 of 8.—Fruit-and-nut farms

Data are based on reports for only a sample of farms. See text.

Item (For definitions and explanations, see text)	Total all commercial farms	Economic class						
		Total	Class I	Class II	Class III	Class IV	Class V	Class VI
FARMS BY COLOR AND TENURE OF OPERATOR								
All farm operators:								
Full owners.....	14,939	632	37	71	128	195	140	61
Part owners.....	8,640	231	45	52	55	30	40	10
All tenants.....	17,491	71	...	5	15	20	25	6
Cash tenants.....	1,497	5	5
Share-cash tenants.....	688
Crop-share tenants.....	5,128	22	5	10	...	5
Live-stock-share tenants.....	136
Croppers.....	8,435	30	10	20	...
Other and unspecified tenants.....	1,340	16	...	5	5	6
White farm operators:								
Full owners.....	11,764	632	37	71	128	195	140	61
Part owners.....	7,110	227	45	52	55	30	35	10
All tenants.....	5,379	76	...	5	15	20	20	6
Croppers.....	1,572	25	10	15	...
Nonwhite farm operators:								
Full owners.....	3,175
Part owners.....	2,630	5	5	...
All tenants.....	12,111	45	10	5	...
Croppers.....	6,845	15	10	5	...
SPECIFIED EQUIPMENT AND FACILITIES AND KIND OF ROAD								
Grain combines.....	farms reporting.....	5,439	137	63	38	71	40	20

Automobiles and/or motortrucks.....	farms reporting.....	11,627	8	...	138	203	235	190
Telephones.....	farms reporting.....	13,987	741	33	118	178	240	175
Home telephones.....	farms reporting.....	1,288	44	...	9	130	140	100
Milking machines.....	farms reporting.....	1,505	11	...	1
Electric milk cooler.....	farms reporting.....	1,466	15	...	10	...	5	...
Crop drier (for grain, forage, or other crops).....	farms reporting.....	11	1
Power-operated elevator, conveyor, or blower.....	farms reporting.....	1,818	6	21	41	15
Farms by kind of road on which located								
Hard surface.....	farms reporting.....	18,494	834	72	123	183	205	165
Gravel, shell, or shale.....	farms reporting.....	7,234	...	5	5
Dirt or unpaved.....	farms reporting.....	18,443	15	...	10	1	45	25
Less than 1 mile to a hard surface road.....	farms reporting.....	9,649	71	...	5	1	35	20
1 or more miles to a hard surface road.....	farms reporting.....	8,774	35	...	5	10
1 mile.....	farms reporting.....	5,223	25	...	5	...	10	...
2 or 3 miles.....	farms reporting.....	1,568	15	5
4 miles.....	farms reporting.....	159
5 or more miles.....	farms reporting.....	133
FARM LABOR, WEEK PRECEDING ENUMERATION								
Hired workers.....	farms reporting.....	10,365	478	76	128	122	90	45
.....	persons.....	47,331	2,458	837	891	360	560	110
Regular hired workers (employed 150 or more days).....	farms reporting.....	5,554	341	71	112	72	60	20
.....	persons.....	16,247	1,146	538	793	147	80	30
Farms reporting by number of regular hired workers								
1 hired worker.....	farms reporting.....	1,478	121	10	21	30	40	15
2 hired workers.....	farms reporting.....	1,202	86	5	25	30	29	...
3 or 4 hired workers.....	farms reporting.....	1,011	47	3	32	6	...	5
5 to 9 hired workers.....	farms reporting.....	627	83	44	33	6
10 or more hired workers.....	farms reporting.....	236	10	9	1
RESIDENCE OF FARM OPERATOR								
Residing on farm operated.....	operators reporting.....	37,284	811	72	115	172	215	175
Not residing on farm operated.....	operators reporting.....	2,392	46	9	16	31	20	15
Operators not reporting residence.....	number.....	2,657	39	2	7	...	15	15

See footnotes at end of table.

STATISTICS FOR THE STATE

State Table 19.—FARMS AND FARM CHARACTERISTICS BY TYPE OF FARM: CENSUS OF 1959—Continued

(Data are based on reports for only a sample of farms. See text.)

Item (For definitions and explanations, see text)	Total all farms	Commercial farms by type of farm					
		Total	Cash-grain farms	Tobacco farms	Cotton farms	Other field-crop farms	Vegetable farms
SPECIFIED CROPS HARVESTED—Continued							
Cotton harvested.....farms reporting...	45,123	30,397	580	12,253	12,081	42	75
acres...	543,832	453,245	19,286	104,134	214,326	583	685
bales...	411,234	351,991	14,961	75,147	171,626	411	615
Irish potatoes harvested for home use							
or for sale.....farms reporting...	5,484	3,432	57	1,900	604	61	28
acres...	4,969	4,323	1	143	49	2,438	606
bushels...	720,984	687,224	556	23,735	7,490	429,726	91,895
Sweetpotatoes harvested for home use							
or for sale.....farms reporting...	15,173	9,362	129	4,207	2,776	97	96
acres...	11,904	9,510	218	3,731	1,564	274	231
bushels...	1,265,438	1,046,288	30,590	400,275	146,945	53,475	17,605
Tobacco harvested.....farms reporting...	23,798	20,227	122	16,274	1,712	10	...
acres...	77,404	73,535	375	62,230	3,487	10	...
pounds...	127,415,681	122,735,196	553,878	107,558,932	4,002,298	13,500	...
Vegetables harvested for sale.....farms reporting...	6,601	4,104	135	615	1,260	47	343
Sales.....dollars...	8,497,113	7,933,490	148,895	126,485	591,565	198,565	4,866,021
Land in bearing and nonbearing fruit orchards, groves, vineyards, and planted nut trees.....farms reporting...	6,355	3,562	144	336	353	2	49
acres...	75,949	64,713	1,035	967	2,302	22	365

¹Includes milk equivalent of cream and butterfat sold.²Does not include acreage for farms with less than 20 bushels harvested.³Does not include data for farms with less than 20 trees and grapevines.

1 Less than 0.05 percent; or reported in small fractions.

2 Includes milk equivalent of cream and butterfat sold.

3 Does not include acreage for farms with less than 20 bushels harvested.

4 Does not include data for farms with less than 20 trees and grapevines.

State Table 21b.—FARMS AND FARM CHARACTERISTICS BY TENURE OF OPERATOR: CENSUS OF 1959—Continued

State Table 23.—SAMPLING RELIABILITY OF ESTIMATED TOTALS FOR COUNTY AND STATE BY NUMBER OF FARMS REPORTING, BY LEVELS

If the estimated number of farms reporting is—	Then the chances are about 2 in 3 that the estimated total would differ from the results of a complete tabulation of the items for all farms by less than—				If the estimated number of farms reporting is—	Then the chances are about 2 in 3 that the estimated total would differ from the results of a complete tabulation of the items for all farms by less than—			
	Level 1 ¹	Level 2	Level 3	Level 4		Level 1 ¹	Level 2	Level 3	Level 4
	Percent	Percent	Percent	Percent		Percent	Percent	Percent	Percent
25.....	40	53	71	96	5,000.....	2.8	3.7	5.0	6.8

500.....	8.9	12	16	21	100,000.....	0.6	0.8	1.1	1.5
1,000.....	6.3	8.4	11	14	250,000.....	0.4	0.5	0.7	1.0
2,500.....	4.0	5.3	7.1	9.6					

¹Level 1 should be used in determining the sampling reliability of estimated number of farms and farms reporting. The level for all other items should be obtained from State Table 24. If the estimated number of farms or farms reporting constitutes more than 75 percent of all farms in the universe, a better approximation to the sampling reliability may be obtained by multiplying the percent given in the table as follows:

1. When the number of farms or farms reporting is 75 percent of all farms, multiply the percent error by 0.50.
2. When the number of farms or farms reporting is 90 percent of all farms, multiply the percent error by 0.30.
3. When the number of farms or farms reporting is 95 percent of all farms, multiply the percent error by 0.20.

To determine the sampling reliability for an item, use this table to determine which of the 4 levels of sampling reliability to use in State Table 23. To use State Table 23, it is necessary to refer also to county or State table to obtain the number of farms reporting for the item.

County Table 4.—CHARACTERISTICS OF COMMERCIAL

(Data are based on reports for only

Item (For definitions and explanations, see text)	The State	Abbeville	Aiken	Allendale	Anderson	Bamberg	Barnwell	Beaufort	Berkeley
Farms, acreage, and value									
1 All commercial farms..... number.....	42,333	332	752	281	1,503	553	516	125	554
2 Land in farms..... acres.....	6,469,427	73,082	199,334	140,929	191,265	135,806	120,799	87,110	107,659
3 Average size of farm..... acres.....	157.5	220.1	265.1	501.3	127.3	234.6	234.6	686.9	194.3
4 Value of land and buildings..... number.....	19,082	12,543	20,766	36,535	15,086	21,769	17,708	90,064	12,665
5 Value of land and buildings..... average per farm, dollars.....	137.11	67.60	87.16	78.34	154.56	97.35	76.03	128.06	116.07
6 Cropland harvested..... farms reporting.....	41,042	307	699	266	1,423	533	500	113	539
7..... acres.....	2,245,829	34,721	64,433	65,196	73,332	58,391	49,935	13,374	19,370
Farm operators.									
8 Working off their farms, total..... number.....	13,600	152	250	62	404	254	133	38	149
9 100 or more days..... number.....	5,293	77	141	47	173	127	76	9	59
10 But other income of family exceeding value of agricultural products sold..... number.....	4,923	87	138	46	196	96	80	13	73
By tenure.....									
11 Full owners..... number.....	14,939	192	327	114	549	226	201	68	262
12 Part owners..... number.....	9,640	30	229	84	344	196	147	34	249
13 Managers..... number.....	263	6	2	4	1	1	13	6	6
14 All tenants..... number.....	17,491	110	180	81	606	130	162	10	37
Specified equipment and facilities									
15 Grain combines..... farms reporting.....	5,939	85	187	108	393	145	61	8	58
16..... number.....	6,645	95	193	155	430	150	66	8	59
17 Corn pickers..... farms reporting.....	1,535	...	68	46	36	81	11	10	23
18..... number.....	1,618	...	68	59	36	93	11	11	23
19 Pick-up trailers..... farms reporting.....	3,486	45	58	33	255	31	36	22	44
20..... number.....	3,593	46	60	34	261	53	36	25	49
21 Motortrucks..... farms reporting.....	19,889	115	465	188	780	342	374	81	240
22..... number.....	25,407	156	640	337	1,033	419	207	180	279
23 Tractors other than garden..... farms reporting.....	20,335	162	470	155	808	346	242	175	302
24..... number.....	33,367	234	745	428	1,391	606	438	248	268
25 Automobiles..... farms reporting.....	30,059	241	608	194	1,162	403	374	80	243
26..... number.....	35,352	275	747	234	1,452	452	459	131	272
27 Telephone..... farms reporting.....	13,897	112	296	112	696	246	208	137	177
28 Horse freezer..... farms reporting.....	20,937	121	403	149	538	146	210	83	225
29 Milking machine..... farms reporting.....	1,505	...	33	1	193	47	...	2	6
30 Electric milk cooler..... farms reporting.....	1,460	...	33	6	153	42	...	2	6
Farms by kind of road on which located									
31 Hard surface..... farms reporting.....	21,830	212	325	162	1,114	267	256	60	225
32 Gravel, shell, or shale..... farms reporting.....	1,234	20	29	11	183	16	...	2	1
33 Dirt or unimproved..... farms reporting.....	18,427	90	396	106	155	269	239	61	317
Farm labor, week preceding enumeration									
34 Family and off-farm workers..... farms reporting.....	34,746	258	692	275	1,198	512	460	110	443
35 Family workers, including operator..... farms reporting.....	33,713	252	670	267	1,171	472	425	101	442
36 Operators working 1 or more hours..... persons.....	32,769	252	649	267	1,146	467	425	100	437
37 Unpaid members of operator's family working 15 or more hours..... farms reporting.....	12,064	22	327	103	486	108	222	39	138
38..... persons.....	21,403	42	389	154	868	133	389	97	201
39 Regular hired workers (employed 150 or more days)..... farms reporting.....	5,561	30	158	79	187	135	95	33	41
40..... persons.....	16,236	58	449	359	304	416	300	312	138
Livestock and poultry on farms									
41 Cattle and calves..... farms reporting.....	20,127	225	439	144	1,042	375	321	70	330
42..... number.....	382,120	6,755	8,544	5,199	23,315	10,119	4,008	5,623	4,831
43 Milk cows..... farms reporting.....	13,216	121	251	79	1,811	611	283	218	281
44..... number.....	81,898	281	1,139	447	6,969	2,851	346	65	643
45 Horses and mules..... farms reporting.....	22,468	181	280	143	563	238	378	77	413
46..... number.....	44,070	419	524	284	1,348	499	866	710	609
47 Hogs and pigs..... farms reporting.....	30,479	186	476	230	877	420	448	76	454
48..... number.....	489,204	1,056	14,269	7,416	8,321	16,380	11,579	2,615	11,704
49 Chickens, 4 months old and over..... farms reporting.....	29,500	228	500	181	1,049	377	405	72	468
50..... number.....	3,886,222	19,017	88,320	35,518	229,447	90,005	18,870	5,639	31,789
Livestock and poultry sold									
51 Cattle, not counting calves, sold alive..... farms reporting.....	5,739	80	217	31	405	135	78	26	93
52..... number.....	75,771	960	3,016	1,206	5,571	2,488	905	261	1,007

THE QUESTIONNAIRE

This census is authorized by Act of Congress, United States Code, Title 13, Sections 5, 9, 142, 221-4, requiring that the inquiries be answered completely and accurately, and guaranteeing that the information furnished be accorded confidential treatment. The census report cannot be used for purposes of taxation, investigation, or regulation.

Form MAY 21 (10-30) 1959

U.S. DEPARTMENT OF COMMERCE—BUREAU OF THE CENSUS
PARSONS, KANSAS
A1 CENSUS OF AGRICULTURE QUESTIONNAIRE: 1959

SOUTH CAROLINA AND GEORGIA

Section I—PERSON NOW IN CHARGE

(If a member of the family or anyone else fills this questionnaire for the person in charge, be sure that all the information is given for the person in charge.)

1. What is your name (person in charge)?

2. What is your mail address?

Section II—OWNERSHIP

OWNED LAND. Include all land and tracts of land owned, regardless of where located, even though these are considered separate units; also cropland, pastureland, woodland, and wasteland.

3. How many acres do you own? None ☐ Acres

(If no land is owned, mark X in the square for "None.")

LAND RENTED OR LEASED TO OTHERS. Include all land and tracts of land rented or leased by you regardless of where located. Include any separate fields, meadows, pastureland, woodland, and wasteland.

4. How many acres do you rent from others? Include acres worked on shares. None ☐ Acres

(If "None," mark X and skip to question [5].)

(a) What is the name and address of each landlord and the number of acres rented or worked on shares for each?

Name of landlord	Acres
Mail address (Post office and State)	Acres
Name of landlord	Acres
Mail address (Post office and State)	Acres

LAND MANAGED FOR OTHERS.

[5] How many acres do you operate for others as a hired manager? None ☐ Acres

(Include the name and address of a manager under question 4.)

LAND RENTED OR LEASED TO OTHERS. Include any separate fields, meadows, pastureland, woodland, and wasteland.

5. How many acres do you rent to others? None ☐ Acres

(If "None," mark X and skip to question [7].)

(a) Of the acres in (a) to (c), how many are

ACRES IN THIS PLACE:

[7] Adding acres owned and acres rented from others, then subtracting acres rented to others, we get

(Question 3 plus question 4 minus question 5.)

This is all the land operated by you even though part of it may be located elsewhere or in other counties. The remaining questions of this report refer to the total acres of land reported for this location.

LOCATION OF LAND

8. Is any of this land located in another county? No ☐ Yes ☐ Acres

(If "No," mark X and skip to question [9].)

(a) How many acres are in your county? Acres

(b) Give names of other counties and acres located in each.

Section III—CROPS HARVESTED THIS YEAR, 1959

Report all crops harvested or to be harvested this year from these (read answer for question 7) acres. If you rent or work land for others on shares include landlord's share as sold if taken from this place.)

CORN AND SORGHUMS. Include the landlord's share as sold if taken from this place.)

CORN

[9] Was any corn harvested for any purpose this year? No ☐ Yes ☐ Acres

(If "No," mark X and skip to question [11].)

(Answer these questions, if "Yes.")

10. Corn for all purposes? (Do not include sweet corn or popcorn.)

(a) Corn for grain? Acres

(b) Corn for silage? Acres

(c) Corn hogged or grazed, or cut for green or dry fodder (ears not husked or shelled)? Acres

(The total of the acres for questions (a), (b), (c), and (d) must equal the acres for question 10.)

SORGHUMS FOR GRAIN, FORAGE, AND STRUP

[11] Were any sorghums harvested for any purpose this year? No ☐ Yes ☐ Acres

(If "No," mark X and skip to question [13].)

12. Sorghums for all purposes? (Include sorghums for grain, silage, forage, pasture, and strup.)

(a) Sorghums for grain or seed? Acres

(b) Sorghums for silage? Acres

(c) Sorghums cut for dry forage or hay, or hogged or grazed? Acres

(d) Sorghums for strup? Acres

(The total of the acres for questions (a), (b), (c), and (d) must equal the acres for question 12.)

SOYBEANS, COWPEAS, PEANUTS, AND VELVETBEANS. (If grown with corn or other crops, report acreage of mixture as grown with other crops; if grown alone, report acreage as grown alone.)

SOYBEANS

[13] Were any soybeans grown for any purpose this year? No ☐ Yes ☐ Acres

(If "No," mark X and skip to question [15].)

(Answer these questions, if "Yes.")

14. Soybeans for all purposes?

(a) Soybeans for beans? Acres

(b) Soybeans for hay? Acres

(c) Soybeans hogged or grazed, or cut for silage? Acres

(d) Soybeans plowed under for green manure, not grazed or otherwise harvested? Acres

(The total of the acres for (a), (b), (c), and (d) must equal the acres for question 14.)

COWPEAS

[15] Were any cowpeas grown for any purpose this year? No ☐ Yes ☐ Acres

(If "No," mark X and skip to question [17].)

15. Cowpeas for all purposes? (Include blackeyes, crowders, whippoorwill, purple hulls, etc. Report those sold for fresh market, or to canners, freezers, or other processors under question 118.)

(a) Cowpeas for dry peas? Acres

(b) Cowpeas for hay? Acres

(c) Cowpeas hogged or grazed, or cut for silage? Acres

(d) Cowpeas plowed under for green manure, not grazed or otherwise harvested? Acres

(The total of the acres for (a), (b), (c), and (d) must equal the acres for question 15.)

PEANUTS

[17] Were any peanuts grown for any purpose this year? No ☐ Yes ☐ Acres

(If "No," mark X and skip to question [19].)

18. Peanuts for all purposes?

(a) Peanuts for picking or threshing? Acres

(b) Peanut vine or tops which were or will be saved for hay or forage? Acres

(c) Peanut vine or tops which were or will be saved for hay or forage? Acres

(d) Peanut vine or tops which were or will be saved for hay or forage? Acres

(The total of the acres for (a), (b), (c), and (d) must equal the acres for question 18.)

VELVETBEANS

[19] Were any velvetbeans grown for any purpose this year? No ☐ Yes ☐ Acres

(If "No," mark X and skip to question [21].)

20. Velvetbeans for all purposes? Acres

SMALL GRAINS. (Include the landlord's share as sold if taken from this place.)

(Answer these questions, if "Yes.")

[21] Wheat? Acres

22. Oats for grain? Acres

23. Barley? Acres

24. Rye? Acres

25. Other grains? Acres

HAY CROPS. (If two or more cuttings, count the acres only once but give total production of all cuttings. Include the landlord's share as sold if taken from this place.)

(Answer these questions, if "Yes.")

26. Alfalfa and alfalfa mixtures for hay and for dehydrating? Acres

27. Coastal Bermuda grass cut for hay? Acres

28. Lespedeza for hay? Acres

29. Oats, wheat, barley, rye, or other small grains cut for hay? Acres

30. Any other hay? Acres

CLOVER SEED, LESPEDEZA SEED, AND OTHER FIELD SEEDS.

[31] Were any lespedeza seed, clover seed, or other field seeds harvested this year? No ☐ Yes ☐ Acres

(Answer these questions, if "Yes.")

32. Lespedeza seed? Acres

33. Crimson clover seed? Acres

34. Tall fescue seed? Acres

35. Lupine seed? Acres

36. Other field seeds? Acres

Other field seeds: Crotalaria? Millet? Rye-grass? Ryegrass? Wild winter peas?

Other field seeds: Crotalaria? Millet? Rye-grass? Ryegrass? Wild winter peas?

Section XI.—FERTILIZER AND LIME

Include all fertilizer and lime used on this place during 1959, whether purchased by you or by your landlord.

271. On how many acres were commercial fertilizer and fertilizing materials used in 1959? None ☐ Acres

If None, mark X and skip to question [272]

Answer these questions if Yes

				How much was used—			
				1. On how many acres was fertilizer used?	2. Dry materials— Include rock phosphate	3. Liquid materials— Include lime	
				None	Acres	Tons	Tons
a	Hay and cropland pasture*					10	10
b	Other pasture, not cropland					10	10
c	Corn*					10	10
d	Soybeans*					10	10
e	Cotton*					10	10
f	All other crops*					10	10

[272] How many acres were limed in 1959? None ☐ Acres

If None, mark X and skip to question [274]

273. How much lime or liming material was used in 1959? Tons

Include ground limestone, hydrated lime, burnt lime, marl, oyster shells, etc. (omit lime used for sprays or sanitation)

Section XII.—SELECTED FARM EXPENDITURES AND LAND-USE PRACTICES THIS YEAR, 1959

EXPENDITURES Include expenses paid, or to be paid by December 31, 1959, by you and your landlord for this place

How much was or will be spent this year for	[274] Feed for livestock and poultry*	None	\$	00	
	Include cost of grain, hay, mill feeds, concentrates, and roughages; also amounts paid for grinding and mixing feed				
275	The purchase of livestock and poultry*	None	\$	00	
	Include baby chicks				
276	Machine hire	None	\$	00	
	For hire custom work such as tractor hire, threshing, combining, cotton picking, cotton ginning, etc.; also, extra picking, baling, plowing, fruit picking, spraying and dusting				
277	Hired labor*	None	\$	00	
	Do not include housework, custom work or contract construction work. Include cash payments only				
278	Seeds, bulbs, plants, and trees*	None	\$	00	
279	Gasoline and other petroleum fuel and oil for the farm business*	None	\$	00	

LAND-USE PRACTICES

280	How many acres of land were used to grow cover crops (five year and less) planted to protect crops	None	Acres
281	How many acres of cropland used for grain or row crops this year were farmed on the contour?	None	Acres
282	How many acres of strip-cropping systems for soil-erosion control were on this place this year?	None	Acres
283	How many acres of crop and pasture land on this place have terraces?	None	Acres

Section XIII.—FARM LABOR

SECTION 3: FARM AND RANCH ACTIVITIES			
284. About how many hours <i>last week</i> did you (the person in charge of this place) do farm work or chores on this place? Mark one	1 None	2 1 to 10 hours	3 11 hours or more
285. How many other members of your family did 15 hours or more of farm work or chores on this place <i>last week</i> without receiving cash wages? Do not include housework	None	Persons	
286. How many hired persons did any farm work or chores on this place <i>last week</i> ? Include members of your family receiving cash wages	None	Persons	

If None, mark X and skip to question [291]

287. Of these hired persons working last week, how many were employed on this place for

(a) 150 days or more during this year? None ☐ Persons

(b) Less than 150 days during this year? None ☐ Persons

(The total for questions a and b must equal the number for question 286.)

	(1) Number of persons	(2) What was the agreed cash rate of pay? (If more than one person, give average)	(3) How many hours per person were these workers expected to work to earn this pay? Per month, hour
288. Of these hired persons working last week, how many were paid on a			
Monthly basis*	Persons	\$ Dollars only	Per month
Weekly basis*	Persons	\$ Dollars only	Per week
Daily basis*	Persons	\$ Dollars only	Per day
Hourly basis*	Persons	\$ Dollars only	Per hour
Piecework basis*	Persons	\$ Dollars and cents	

(The total of the persons put in column 1 must equal the number for question 286.)

289. How many hired persons paid on a piecework basis worked on this place last Friday? None ☐ Persons

If None, mark X and skip to question [291]

290. How much did the hired persons on piecework basis get for their work last Friday? \$ 00

Section XIV.—EQUIPMENT AND FACILITIES NOW ON THIS PLACE

Include equipment, whether owned by you or by others, on this place. Include equipment and facilities that are temporarily out of order.

How many of the following are on this place	Number
[291] Grain combines*	
292. Corn pickers (include picker-shellers and corn combines)*	
293. Pick-up balers*	
294. Field forage harvesters for field chopping of silage and forage crops*	
295. Motortrucks (include pickups)*	
296. Wheel tractors other than garden*	
297. Garden tractors*	
298. Crawler tractors (tracklaying)*	
299. Automobiles*	
300. Telephone*	No <input type="checkbox"/> Yes <input type="checkbox"/>
301. Home freezer (for quick freezing and storing food)* (Do not include refrigerator)	No <input type="checkbox"/> Yes <input type="checkbox"/>
302. Milking machine*	No <input type="checkbox"/> Yes <input type="checkbox"/>
303. Electric milk cooler*	No <input type="checkbox"/> Yes <input type="checkbox"/>
305. Trap drier for grain, forage, or other crops*	No <input type="checkbox"/> Yes <input type="checkbox"/>
306. Power-operated elevator, conveyor, or blower*	No <input type="checkbox"/> Yes <input type="checkbox"/>

307. On what kind of road is this place located? Mark one	(1) Hard surface <input type="checkbox"/>	(2) Gravel, shell, or shak <input type="checkbox"/>	(3) Dirt or unimproved <input type="checkbox"/>
	If marked here, answer		
	How many miles to a hard surface road? <input type="checkbox"/> 1 or less <input type="checkbox"/> 1 to 10 <input type="checkbox"/> 11 or more		

Section XV.—RENTAL AGREEMENT, FARM VALUES, AND MORTGAGE DEBT

308 a. Do you rent any land from others?	No <input type="checkbox"/> Yes <input type="checkbox"/>
b. Do you own any land on shares?	No <input type="checkbox"/> Yes <input type="checkbox"/>
If Yes, for both questions 308 a and 308 b, answer questions 309 through 313	
309. Does the landlord furnish all the work animals or tractor power on a part of his share of the operation of the place?	No <input type="checkbox"/> Yes <input type="checkbox"/>
310. Do you pay to your landlord any cash as rent?	No <input type="checkbox"/> Yes <input type="checkbox"/>
a. If Yes, how much for the year?	\$ 00
311. Do you pay to your landlord any share of the crops (such as 1/3)?	No <input type="checkbox"/> Yes <input type="checkbox"/>
312. Do you pay to your landlord any share of the livestock or livestock products (such as 1/3)?	No <input type="checkbox"/> Yes <input type="checkbox"/>
313. Do you have this land under any other arrangement (such as a fixed quantity of any product, upkeep of land and buildings, payment of taxes, keep of landlord, rent free, etc.)?	No <input type="checkbox"/> Yes <input type="checkbox"/>
	None <input type="checkbox"/> Acres <input type="checkbox"/>
[314] About how much would the land and the buildings sell for	(1) None <input type="checkbox"/> (2) Total value (dollars) \$ 00
a. Land and buildings owned by you? (Crops acres from question 3)	\$ 00
b. Land and buildings rented from others? (Crops acres from question 4)	\$ 00
c. Land and buildings managed for others? (Crops acres from question 5)	\$ 00
d. Land and buildings rented to others? (Crops acres from question 6)	\$ 00

315. Is there any mortgage debt on land and buildings owned by you? Mark one

No ☐ Yes ☐ No land owned ☐

Give month and day

316. On what date did you fill this question? 1959

REMARKS
